Stolen things are apt to be guased. There never was, and never will be, universal panacea, in one remedy, for all lls to which tlesh is heir-the very nature of many curatives being such that were the gorms of other and differently seated diseases rooted in the system of the patient -what would relieve one ill, in turn would aggravate the other. We have, however, in Quinine Wine, when obtained in a sound unadulterated state, a remedy for many and grievous ills. By its gradual judicious use, the frailest systems are led into convalescence and strength, by the influence which Quinio exerts on Nature's own restoratives. It relieves the drooping spirits of those with whom a chronic state of morbid despondence and lack of interest in life is a disease, and, by tranquitizing the nerves, disposes to sound and refreshing sleep, imparts vigor to the action of the blood, which, being stimulated, courses throughout the veins, strengthening the healthy animal functions of the system, thereby making activity a necessary result, strengthening the frame, and giving life to the digestive organs; which naturally demand increased substance-result, improved appointe. Northrop & Lyman, of Toronto, have given to the public their Quinino Wine at the usual rate, and, guaged by the opinion of scientists, this

We were Mistaken

We expected there would have been a reduction in the new tariff, as compared with the old, of about 25 per cent. We were mistaken. It only amounts, as nearly as we can estimate it, to about 121 per cent. We are glad it is settled, as we are no longer working in the dark. The reductions already made in our goods will stand as they are. The pub-'lie have begun to appreciate the fact that there is a great difference in the price of our imported goods, as compared with other stores, resultingfrom our having marked our goods on the basis of a 25 per cent. lower

Dress Goods

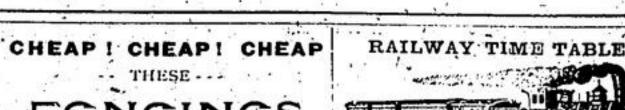

On Monday we took out of bond a large shipment of British goods which, coming in under the new tariff, will be considerably cheaper than

stock held in the city and imported under the old tariff. The goods that fill our shelves are fairly aching to have their good qualities and keen values placed before you in the papers. Worthy of special mention are Dress Goods, Dressmaking and Millinery. These departments we are almost afraid to advertise, as we have had such a tremendons rush in them that to make them any more prominent, might so crowd the channels of business that justice could not be done to all. We trust the good will of the puplic to do their shopping earlier in the week, and, if possible, earlier in the day, and thus give our milliners, who are working to distraction, an opportunity of getting out their work

without coming so dangerously near to working on the Sabbath. We ask this in the interests of humanity, and we feel sure the ladies of Guelph and the country generally will heartily respond
