

## Do You Use It?

It's the best thing for the hair under all circumstances. Just as no man by taking thought can add an inch to his stature, so no preparation can make hair. The utmost that can be done is to promote conditions favorable to growth. This is done by Ayer's Hair Vigor. .. It removes dandruff, cleanses the nourishes the soil in which the hair grows, and, just as a desert will blossom under rain, so bald heads grow hair, when the roots are nourished. But the roots must be there. If-you wish your hair to retain its normal color, or if you wish to restore the lost tint of gray or faded hair use Ayer's Hair Vigor.

THE DANGER SIDE OF LIGHTN. INQ-RODS.

The conventional lightning rods that one eees over houses and barns in the country and small towns afford but little protection to the buildings. Small as this security is, it is wholly lost if the so-called conductors are improperly constructed, and and not in perfect order, when they, in fact, become an absolute menace to the building they are reared to guard. It is essential, if the conventional rol is to be set up that the work be entrusted to reliable and capable persons, otherwise it may become a shining invitation to dangers. It is probable, therefore, all things considered, that a building is as well, if not better, protected without such conductors as are in general use as with them. It is safe to assert that the great majority of buildings damaged or destroyed by light; ning were provided with lightning-rode," and in the majority of these cases the conductors invited the thunder bolts, and for some cause, probably improper constpruction, could not lead the lightning harmless-
