On the list | quoted at 62 cents affeat at Fort William, now being prepared, and which will be sold on Saturday at \$1.10 a bushel. One completed by the judge in a few weeks, lot of No. 1 hard sold at Goderich at \$1.10, the next election of the Legislature will be and \$1.12 was asked for more. It is held held. Lists may be had by applying to the at Montreal at \$1.18. In the same way municipal clerk. See that your name is on. | the advance in in Manitoba wheat is most The only qualifications are: a British sub- | marked. New North and West wheat sold ject, 21 years of age, and a resident of the

The Ontario Bureau of Statistics reports that the yields of the present year on the whole promise to exceed those of 1896, and also to exceed the average of the fifteen years, 1882-06. Fall wheat shows an igorcased area of 73,000 acres, with ten million bushels promised, an average of over 25 bushels an acre. Spring wheat has taken a move up again, both in acreage and promised yield. The acreage and yield of barley are both somewhat baiow the previous year. The yield of oats promised is 4,000,000 bushels greater than the enormous yield of 1896. In round figures, the crop is estimated at 87,000,000 bushols. The yields of rye and beans are above the average, and that of peas below the

No one sho has lived among the people of the United States can deny that hostility to Great Writain is one of the most potent. forces at the make-up of the average "American." It is notable that it crops out oftenest in purely friendly discussion. Let a Canadian go to New York City, for instance. Let him form with some citizen of the United States a friendship that apart from consideration of nationality is ideal. Ho will find-Canadians are finding overy day-that his American friend's hostility to the Mother Land is aggravated to the war pitch. It is the simple result of education. The common school histories of the United States are so fashioned as to instil this spirit in every man whom no material consideration for any culture in high degree has led to a more proper conception of the high duties of the Anglo-Saxon race. The feeling is actually bilions in its persistency and irritancy. It makes the average United Stateser "hot under the collar" to hear the name of Britain men tioned, and it is one of the joys of his life. that there are only five millions of people in Canada and that the colony seems to be "au casy march" for "American" con

MILLIONS FOR FARMERS.

The Prices for Wheat in Ontario and Elsewhere Advancing.

GOOD TIMES ARE AT HAND. Farmers should be happy. Present prices of wheat are the highest for several years, and growers are getting the full benefit of the unusually good prices The best of it is that crops of both spring and fall wheat are greater than for many sore sons. With prices 15 to 200. higher, and an increase of 5,000,000 bushels in yield, the value of the wheat crops in Ontario will be between \$6,500,000 and \$8,000,000 more than last year. This is a very encouraging feature, and warrants the prediction that general trade in Canada will be better the coming year than our merchants have of late years been accustomed

to experience. A comparison of prices of Mauitoba wheat shows a still greater contrast in favor of this season. At Fort William and Port Arthur No. 1 hard is worth 950. a compared with 620. a year ago. The same grade sold last week at \$1.03 in Toronto, as against 70c. a year ago. Harvesting began early in Manitoba this season, and a good yield seems to be expected. Conservative ostimates place the orgp at about 25,000, 000 bushels, which is much in excess of

Grain mon on the Toronto Board Trade are all talking dollar wheat, and it is a long time since the quotations coming over the wires have been so esgerly watched. The recent rapid advances have led to the belief that a still furthur rise will take place, and the strong statistical position i pointed to as showing that the advance is

legitimate and likely to hold. A large deficit is reported in European crop, and if this turns ou to be a fact then our wheat will be required, and all of it that can be spared. Some of the Ontario dealers are said to have made good profits in purchasing and reissue in fifteen years. Both bills are green | vance on the Toronto market of six and

more than last year. The advances all through are of a most The present is the time to see that your remarkable nature. No. 1 hard Manitoba last year at 60 to 61 cents. On Saturday it sold at 90 cents. Old North and West, which was quoted last year at 64 and 65 cents, sold on Saturday at 95 cents, a clear advance in both cases of 80 cents a bushel. Local deliveries at the present time are very light, as is natural upon an advancing market, but if the price goes up to a dollar

the farmers will be free sellers. Both Ontario and Manitoba flour have also sharply advanced. Manitoba patents show an advance of \$2.10 a tariel. The advance in Ontario flour is about \$1.50 a barrel, being quoted on Saturday at \$4.70; a year ago it sold at \$3.20.

The udvance in prices gives the farmers an advantage which all will appreciate. As usual, notwithstanding the hopes for still higher prices, we believe it is in the farmers' best interests that they sell their wheat within the next few days. An ex perienced dealer in one of the big markets tenders this advice: "Farmers, sell your wheat. There is a very large supply it Ontario, and you should get rid of some of it while the export demand is good. Prices are unusually high, and the farmers should reap the benefit of them. Dealers have little or none. Let them have it and let the dealers and speculators assume the

VALUABLE VARIETIES OF FALL

Reports of Successful Winter Wheat Experiments from 231 Ontario Farms.

There will likely be about 800,000 acres sown with fall wheat in Ontario within the next month. It is very important, therefore that fall wheat growers take every available means to scoure those varieties which are likely to give the best results. By experiments conducted within the past eight years at the Ontario Agricultural College with 152 varieties of winter wheat, it is found that there is a great variation in the comparative yields of grain produced by the different varieties. It is also found that the varioties which have given good average results in the experiments conducted at the College for a few years in succession have usually given good satisfaction throughout Ontario. This fact has been determined by the results of co-operative experiments conducted -- throughout the Province during each of the past five years in connection with the experimental work

ties have been selected each year for, send ing out to ex-students of the Agricultura College, and to other interested and pro gressive farmers throughout Ontario, who have expressed their desire to join in the co-operative experimental work, and have written for the necessary material: In the autumn of 1896 seven varieties winter wheat were selected for distribution and were divided into three sets with three varieties in each, the Dawson's Golder Chaff being used throughout as a basis by which the results of all the varieties could be compared with one another. We have received 281 full and satisfactory reports of carefully conducted winter wheat experiments for 1807. This number is more than double that of any previous year. These reports came from 35 counties, 19 of which

are situated east and 16 west of Guelph.

The following table gives the comparative

results of straw and grain per acre of the

winter wheat varieties tested during the

at the College. From seven to nine varie-

past season on 231 farms :-Dawson's Golden Chaff, 9 9

As none except the '281 good reports successfully conducted experiments have been used in the preceeding summary of results, the table should be of great value and worthy of the thoughtful attention of wheat growers in Ontario. Much credit is due to the careful experimenters who sent us the reports of the 'tests made on their

1. In the average yield of winter wheat per acre, the Dawson's Golden Chaff stood highest among 11 varieties tested over Ontario in 1898, 9 varieties in 1894, 9 varisties in 1895, 9 varieties in 1898, and 7 varieties in 1807, also among 53 varieties grown at the Agricultural College for six

2. Three varieties of winter wheat have been tested over Ontario for four years in succession, with the following average yields of grain per acre: Dawson's Golden Chaff, 324 bushels; Early Red Clayson, 204 bushele; and Early Genesee Giant,

3. Dawson's Golden Chaff was the must popular variety with the experimenters ineach of the past four years. .

4. In the co-operative experiments for 1897, Stewart's Champion, Pride of Genesee, Dawson's Golden Chaff, and Siberian, made the best appearance in the spring. 5. Dawson's Golden Chaff and Early Genesee Giant possessed the strongest, and the Pride of Genesee and Siberian the

6. The Dawson's Golden Chaff and the Stewart's Champion were the least, and the Pride of Gonesee and the Early Genesee Giant were the most effected by rust. 7. The Stewart's Champion and the

weakest straw in 1897.

Pride of Genesce produced the greatest length of straw. 8. The Early Red Clawson and the Dawson's Golden Chaff were the first to

mature and the Early Genesee Giant and the Stewart's Champion were the last to 0. The Dawson's Golden Chaff and the Stewart's Champion produced the plump est grain, and the Siberian and Poole the

nost sbrunken grain. 10. The counties of Grey, Middlesex and Horon furnished the largest number of successful winter wheat reports in 1897. 11. The experimenters have taken much

nterest in the work as shown by the many favorable comments given in the reports, the following being an example : "Co-operative experiments should be located in con-Pickard), which took place rather auddenly spicious places as object lessons. My experiment with the winter wheat was near the road where 200 to 800 rigs passed daily. The visitations to the plots were very numerous. The remarks by passers by and the comparisons made would fill a volume. The experiment actually became the leading topic of the village talk for some time previous to harvesting. Thus many object lessons were learned by every day observers. I have taken a good deal of pains with the experiment but feel well

> The following leading varieties of winter wheat will be distributed this year for cooperative experiments in Ontario :-SET 1. Dawson's Golden Chaff, Early Giant, and Early Red Chawson.

SET 2. Dawson's Golden Cheff, Pride of Genesce, and Poole. BET 8. Dawson's Golden Chaff, New Columbia, and Imperial Ambor.

Any person wishing to conduct a careful experiment with one of these sets should apply to the experimentalist, Agriquitural College, Guelph, for the desired set and one-half pound of every variety together with instructions for testing and the blank form on which to report will be furnished free of cost to his address. The supply o some of the varieties is limited but we will be enabled to furnish a large number with this seed before the supply is exhausted. C. A. ZAVITZ,

Agr'l College, Guolph, Aug. 23rd, 1897.

DISEASE CONQUERED

DR. WILLIAMS' PINK PILLS GAIN ANOTHER GREAT VICTORY. Reporter's Scarching Investigation into a Case at Orangeville-The Claims Made on Behalf of this Medicine Fully Borne Out-The Greatest Healing Medicine of the

rom the Orangoville Sun. In a cosy little house in Margaret Street, in this town, lives Mr. John Garrity, his wife and family. They are indeed a happy family, although a few years ago a sadder household would be hard to find .. Their happiness was not occasioned by the sudden obtaining of a fortune, but by come thing much more precious-the restoration to health of a wife and mother when every

one whispered that she must die. Our reporter heard of Mrs. Garrity's illness and cure, and for the benefit of our readers investigated the case; what he learned is well, worth repeating. A few years ago Mr. Garrity kept a well known botel at Cheltenham and was known far and wide for his hospitality and kindness; his wife, too, was noted for her amiability. However, she was stricken with a peculiar sickness, her health failed rapidly and from one hundred and forty-seven pounds her weight became reduced to nimety-five pounds. Fainting polls became frequent and a continual pain in the back of her head almost drove her frantic. Physicians were in attendance, but the doctors all said there was no hope. Mrs. Garrity saw death staring in the face, and the thought of leaving her little children caused her much saduess. She was advised to try Dr. Williams' Pink Pills, but thought they could not possibly do her any good when physicians had failed to alleviate her suf ferings. Hoping, however, almost against hope, she procured a supply, and wonderful to relate she had not been taking Pink Pills long when the dreadful symptoms of her illness began to pass away, and to-day she is the picture of health. A few months go Mr. Garrity and family removed to Orangeville, and in conversation with our representative Mrs. Garrity said :- "I cannot find words to express my thankfulness for what Dr. Williams' Pink Pills have
