That's Ayer's. The same old sarsaparilla as it was made and sold by Dr. J. C. Ayer 50 years ago. In the laboratory it is different. There modern applinuces lend speed to skill and experience. But the sarsaparilla is the same old sarsaparilla that made the record-50 years of cures. Why don't we better it? Well, we're much in the condition of the Bishop and the raspberry: "Doubtless," he said, "God might have made a better berry. But doubtless, also, He never did. " Why don't we better the sarsaparilla? We can't. We are using the same old plant that cured the Indians and the Spaniards. It has not been bettered. And since us make sarsaparilla com-, pound out of sarsaparilla plant, we see no way of improvement. Of course, if we were making some secret chemical compound we might .... But we're not. We're making the same old sarsaparilla to cure the same old diseases. You can tell it's the same old sarsaparilla because it works the same old oures. It's the sovereign blood purifier, and-it's Ayers.

BAD WATCHES are made worse by incompetent workmen because it takes a better workman to make a bad watch good than it does to make a good watch bad. If you have a watch which has done good service give it a chance to do more. A saving of twenty-five cents in the price of repairing will not make up for a more than likely double that amount

I have a reputation to keep up. My life's study has been repairing watches and how to do it well and I have been successful at it. I have every facility for doing the best possible work and I do positively desire you to come and ask for the return of the amount paid, if any timepiece of any kind repaired by me does not run well after. My reputation is worth more to me than all the dollars I may have to return. Please don't
