A return prepared by the Department of Interior shows that from the beginning of the season's work up to April 80, 10,641 settlers had gone into Western Canada. The week ending April 80th shows that 1,544 people had gone into the west for the purpose of making their homes there. Those who have gone to the Yukon are not included. The agents of the government in the United States are working hard, and it is expected that before next winter fully 80,000 people will be added to the population of Manitobaand the Territories. The high prices assured for farm produce of all kinds; as well as the assurance of excellent good yields of wheat and other cereals, are large factors in the develop-

NO U. B. SHIP OR SOLDIER LOST WASHINGTON, May 9 .- After a week of great anxiety all doubt as to the fesue of the battle of Manilla was ended Saturday morning by the receipt of messages from Hong Kong, first by newspapers from their correspondents and then by the Washington authorities from Commodore Dowey. The victory in Manilla Bay was more brilliant and complete than the most ardent American could have hoped for. the marvellous cares effected by the use of Dr. Williams' Pink Pills little think that right in their midet exist many who have been relieved from pain and suffering by the use of these wonderful little pills after having suffered untold agenies for months. Mr. John Hitch, a man well and favorably known throughout the country, was over ready when opportunity offered to speak a word in favor of these pills and was never fired of recommending them-to his friends. A representative of the Standard, auxlous to know of the pause of Mr. Bitch's recommendation, called upon him at his home recently and upon telling that gentleman the object of his visit Mr. Hitch consented to an interview. The story in his own words is as follows :-"In the winter of 189I I was taken with a severe. attack of la grippe, from which I was cou-

fined to the house for some time. This was followed by severe pains and swellings of my lower limbs. I consulted a physician and he told me it was acute rhenmatism. I continued under his care for about two months. I was unable to stand alone, but sometimes when I got started I was able to make a few steps unaided. The trouble was principally in my feet and clung to me all summer long. I tried almost everything that friends suggested, hoping to gain relief, but neither medicine taken internally nor -liniments applied externally gave me any relief. The pain was very great, and I was only too ready to try anything suggested. I spent dollars upon dollars in doctor's medicine, but all to no purpose. The last week I was attended by a physician it cost me five dollars, and having about that time read in the newspapers of the work accomplished by Dr. Williams' Plok Pills, I concluded it was certainly worth the experiment and accordingly purchased a box from a local druggist and commenced their use, discontinuing the doctor's medicine. This was in June

or July 1892. After I had taken the first

box of the pills I could feel some change

and after taking seven boxes I noticed a

them until I had used thirteen boxes when

You begin to realize that the old man knows a thing or two after all. However, boys, just want to say that I am still at the workbench, overseeing and doing every job that you bring me, big and little. I only charge the same as all other good walchmakers, and only wish to do the work of those who want'it done well, because my reputation depends on my good work, and I cannot afford to do bad work. (Of course I often do cheap work for those who merely want their watches started so as to trade off.) I again state emphatically that I am desirous of returning all the money paid me for any work which has not given satisfaction. I have sometimes to do so when the antch is
