It's the best thing for the hair under all circumstances. Just as no man by taking thought can add an inch to his stature, so no preparation can make hair. The utmost that can be done is to promote conditions favorable to growth. This is done by Ayer's Hair Vigor. It removes dandruff, cleanses the scalp, nourishes the soil in: which the hair grows, and, just as a desert will blossom under rain, so bald heads grow hair, when the roots are nourished. But the roots must be there. If you wish your hair to retain its normal color, or if you wish to restore the lost tint of gray or faded hair use Ayer's Hair Vigor.

BLIND MEN'S DREAMS.

One of the most intelligent inmates of a blind asylum, who came into the world blind says that he never dreams of the things he has read about and never dreams of anything or person that he has not in some way come into personal contact

He dreams of music, of the voices of persom he knows, of such insidents as might happen at the home or in some place in which he has actually been, but never of incidents in other places or in other lands. Even although he has read descriptions of localities, of natural beauties, of the appearance of a street or city, no idea of what they look like becomes to him in the fancies of his sleep.

The Sunday School teacher had reached a point in the lesson where she was dweling upon the future reward of those who behaved properly here when the audacious small boy, who frequents most Sunday schools spoke up and asked if all good people went to heaven.

By its gradual judicious use, the frailestsyste ms are led into con valescence and strength, by the influence which Quinine exerts on Nature's own restoratives. It relieves the drooping spirits of those with whom a chronic state of morbid despondence and lack of interest in life is a disease, and, by tranquilizing the nerves, disposes to sound and refreshing sleep, imparts vigor to the action of the blood, which, being stimulated, courses throughout the seins, strengthening the healthy animal functions of the system, thereby making activity a necessary result, strengthening the frame, and giving life to the digestive organs, which naturally demand increased substance-result, improved appetite.
