

And why give them a five or ten years more?

Better give them good reasons for guessing the other way. It is very easy; for nothing tells of age so uickly as gray hair.

It hides the age under a luxuriant growth of hair the It never fails to restore color to gray hair. It will stop the hair from coming out also. It feeds the hair bulbs. Thin hair becomes thick hair, and short hair becomes long

The young Jolks. SHILES AND TEARS.

You bid me sing a gay refrain, Win from my lyre a note more glad, And when I chose a brighter strain, Still-still you told me it was sad.

I did not mean it should be so, Nor was my wish to make you sigh But you are young and do not know How joy and grief together lie.

There over is a minor chord Struck somowhere in our sarthly lays, Ever a shadow on the sward Of brightest scenes whereou we gazo, And while we may not heed the one

Nor hear the other, each is there, Yet lurking in the blithest tone, Yot darkening the landscape fair. Thus, often scarcely knowing why We cannot look without a tear.

Though joyous by the song we hear.

HE MANAGED IT.

And so it is we sometimes sigh,

A cortain wealthy man has set his nephew up in business three times, but the young man lacks something essential to success-in-the mercantile direction and failed with each effort. When he came with the fourth request for financial backing, the uncle demurred.

"You must learn to lean on yourself," he said. "I can't carry you all your life. It's would be an unkindness in me to keep supplying you with money to carry or enterprises that invariably end in failure I'll tell you what I'll do. You owe s good deal as the result of that last 'spec.' Pitch in on your own book and go it alone till you pay those debts of. When you've don't that, I'll give you a check for all they amount to. Such an experience would do you more good than all the money I could give you now."

Three months later the nephow walked in with every claim receipted in full, and the uncle was delighted as he gave the promised check. "That's something like it now, and I:

warrant you feel all the better for the hard! training. How did you manage, Tom?" "Borrowed the money, uncle." Now the old gentleman is telling every

one that there is the making of a great financier in his nephew .- Tit-Bits. The British postoffice makes \$20,000 a

THE SIZE OF THE SEA. Here are a few facts about the sea for

The Pacific covers 68,000,000, the Atlanio 80,000,000 and the Indian Ocean, Arctic and Antarctic 42,000,000 square miles. To stow away the contents of the Pacific it would be necessary to fill a tank one mile long, one mile wide and one mile deep every day for 440 years. Put in figures, the Pacific holds in weight 048,000,000,000,000,-O00,000 tons. It would take about 1,000,-

falls of Niagara. The average depth of the Atlantic is not Quite three miles. Its waters weigh 825,-000,000,000,000,000 tons, and a tank to contain it would have to have each of its mix sides 480 miles long. The figures of the other oceans are in the same startling propertions. It would take all the sea water in the world about 2,000,000 years to flow over Niagara. A tank to hold it all would have to measure nearly 1,000 miles along

each of its sides. WASH YOUR HANDS.

It has recently been claimed that cases of infection that could be accounted for i no other way have been explained by the fingers as a vehicle. In handling money especially of paper, doorknobs, banisters, car straps and a hundred things that every one must frequently touch, there are chances innumerable of picking up germs of typhoid, scarlatina, diptheria, small-pox, eto. - Yet-some - people-actually - put such things in their months, if not too large.

Before eating or touching that which is eaten the hands should be immediately and sorupulously washed. We hear much about general cleanliness as next to godliness. It may be added that here in particutar it he also theid of beatthraid safety. The Jews made no mistake in that "except they washed they ate not." It is a sanitary ordinance of decenoy .- New York

SUB ROSA.

Sub rosa means literally "under the OSB," The phrase dates from 477 B. C. when Pansanias, the commander of the confederated fleet of Spartage and Athenians, was engaged in an intrigue with Xerxes to betray Greece to the Persian ruler and to obtain in marriage the hand of the monarch's daughter. Their negotiations were carried on under a roof which was covered with roses and were matured literally "under the rose." Pausanias, however, was betrayed, and, to escape arrest, fled to the temple of Minerva. The sanctity of this place forbidding intrusion for violence of any kind, the people walled up the edifice with stones and left the fagitive to die of starvation. His own mother laid the first stone. It afterward pecame a custom among the Athenians t wear a rose when they had confidential compliments to make, the flower implying strict secrecy. It was also customary among the ancient Germans on the occasions of festivity to suspend a rose above the table as a token that whatever was said during the feast should be kept secret

There never was, and never will be, iversal panaoca, in one remedy, for all ills to which flesh is heir-the very nature of many curatives being such that were the germs of other and differently seated diseases rooted in the system of the patient -what would relieve one ill, in turn would aggravate the other. We have, however, in Quinine Wine, when obtained in a sound unadulterated state, a remedy for many and grievous ills. By its gradual judicious use, the frailestsystems are led into convalescence and strength, by the influence which Quinine exerts on Nature's own restoratives. It relieves the drooping spirits of those with whom a chronic state of morbid despondence and lack of interest in life is a disease, and, by tranquilizing the nerves, disposes to sound and refreshing sleep, imparts vigor to the action of the blood, which, being stimulated, courses throughout the veins, strongthening the healthy animal functions of the system; thereby making activity a necessary result,? strengthening the frame, and giving life to the digestive organs, which naturally demand increased substance-result; im proved appetite.
