Backache and Kidney trouble make a Halifax lady's life mit rable. DOAN'S KIDNEY PILLS CURED HER

It would be well if every lady in Canada understood that pain in the back and backache were not hing more nor less than a cry of the disordered kidneys for help. Hundreds of ladies have found Donn's l'idney l'ills a blessing, giving them relief from all their suffering and sickness. troubled with a weakness and pain across the small of her back, which was so intense at times that she could hardly stoop.

Hearing of Doan's Kidney Pills she got a box, and is thankful to say that they completely removed the pains from her back and gave tone and vigor to her entire system. Mrs. Stanley also added that her husband had suffered from kidney derangement, but one box of Doan's Kidney Pills completely cured him.

HEART PAINS

The Heart and Nerves are Often Affected and Cause Prostration of the Entire System.

A Kingston Lady Testifies to Her Experience in the Use of Milburn's Heart and Nerve Pills

People who sufferfrom any disease or disorder of the heart nervous system, such as Palpitation, Skip Beats, Smothering or Sinking Sensations, Sleeplessness, Weakness, Pain in the Head, etc., cannot afford to waste time trying various remedies, which have nothing more to back up their claimsthan the bold assertions of their proprietors.

These diseases are too serious to permit of your experimenting with untried remedies. When you buy Milburn's Heart and Nerve Pills, you know you have behind them the testimony of thousands of Canadians who have been cured by their use. On s of these is Mrs. A. W. Irish, 92 Queen Street, Kingston, Ont., who writes as follows: "I have suffered for some years with

smothering sensation caused by heart disease. The severity of the pains i my heart caused me much suffering. was also very nervous, and my whole system was run down and debilitated. "Hearing of Milburn's Heart and Nerve Pills being a specific for these oubles, I thought I would try them, and therefore got a box at McLeod's Drug

"They afforded me great relief, having toned up my system and we moved the distressing symptoms from which I suffered. I can heartily recommend these wonderful pills to all sufferers from heart trouble."

Gas truste may not make the world any better, but they make it a little brighter. There never was, and never will be, a universal panaces, in one remedy, for all ills to which flesh is heir-the very nature of many curatives being such that were the germs of other and differently seated diseases rooted to the system of the patient -what would relieve one ill, in turn would aggravate the other. We have, however, in Quinine Wine, when obtained in a sound unadulterated state, a remedy for many and griavous ills. By its gradual judicious use, the fr silestsystems are led into convalescence and strength, by the influence which Quinine exerts on Nature's own restoratives. It relieves the drooping spirits of those with whom a chronic state of morbid despondence and lack of interest in life is a disease, and, by tranquilizing the nerves, disposes to sound and refresh ing eleep, imparts vigor to the action of the blood, which, being stimulated, courses throughout the veine, strengthening the healthy animal functions of the system, thereby making activity a necessary resul strengthening the frame, and giving life to the digestive organs, which naturally proved appetite. Northrop & Lyman, of Toronto, have given to the public their Quinine Wine at the usual rate, and guaged by the opinion of scientiate, this In the market. All droggists sell it.

Kidney diseases are the most in-sidious of all diseases common to humanity; within the past few years medical science has made wonderful strides in coping with its ravages. South American Kidney Cure has proved rich in healing power, and every day testimony is piled up for its great curative qualities. Where kidney disease exists it is generally indicated by certain changes in the urine, such as mucus, sediment, albumen, brick dust, acid and blood—pain is not necessarily an accompaniment, which only aggravates the insidious nature ofit. Testing and experimenting has disclosed the fact that the passing through these organs of the solid particles in the ordinary course of circulation do in a remarkably short while clog up, grind out and impair them so that the functions of these organs are not performed and disease lays hold on the patient with a ruthless hand.

Kidney diseases require a solvent—
