Didn't Walk for 5 Months. Doctors said Locomotor Ataxia.

Milburn's Heart and Nerve Pills Cure a Disease hitherts regarded as Incurable. The case of Mr. G. O. Archibald, of Hopewell Cape, N.B., (a c t of whom appears below), is one of t a severest

reported from the sustern provinces, and his cure by Milburn's Heart and Nerve Pills the more remarkable from the fact that he was given up as incurable by worthy and respected physicians. The disease, Locomotor Ataxia, wit which Mr. Archibald was afflicted is considered the most obstinute and incurknown. When ence it starts it graduall but surely progresses, paralyzing the lower extremities and rendering its vie. tim helpless and hopeless, enduring the

indescribable agony of seeing himself die by inches.
That Milburn's Heart and Nerve Pills disease of such severity ought to encour-age those whose disorders are not so serious to try this remedy.

The following is Mr. Archibald's letter:

MESSRS, T. MILBURN & Co .- "I can some you that my case was a very severe e, and had it not been for the use of l ilburn's Heart and Nerve Pills I do not lieve I would be alive to-day. I do r t know, exactly, what was the cause of the disease, but it gradually affected ray legs, until I was unable to walk hardly any for five months. "I was under the care of Dr. Morse,

of Melrose, who said I had Locomotor Ataxia, and gave me up as incurable.
"Dr. Solomon, a well-known physician of Boston, told me that nothing could be done for me. Every one who came to visit me thought I never could get better.

"I saw Milburn's Heart and Nerve Pills advertised and thought I would try them anyway, as they gave more promise of helping methan anything I know of . "If you had seen me when I started taking those wonderful pills-not able to get cut of my room, and saw me now working hard every day, you wouldn't "I am agent for P. O. He who writes for fools finds an enormous audience. Of had books we can never read too little ; of the good never too much. There never was, and never will be, a unliversal panacea, in one remedy, for all ills to which flesh is heir-the very nature of many curatives being such that were the germs of other and differently seated diseases rooted in the system of the patient -what would relieve one ill, in turn would aggravate the other. We have, however, in Quinine Wine, when obtained in a sound unadulterated state, a remedy for many and grievous ills. By its gradual judicious use, the frailest systems are led into convalescence and strength, by the influence which Quinine exerts on Nature's own restoratives. It relieves the drooping spirits of those with whom a chronic state of morbid despondence and lack of interest in life is a disease, and, by tranquilizing the nerves, disposes to sound and refreshing sleep, imparts vigor to the action of the

blood, which, being stimulated, courses throughout the veins, strengthening the healthy animal functions of the system, thereby making activity a necessary result strengthening the frame, and giving life to the digestive organs, which naturally demand increased substance-result, improved appetite. Northrop & Lyman, of Toronto, have given to the public their Quinine Wine at the usual rate, and, guaged by the opinion of scientists, this wine approaches nearest perfection of any

The Wilson Chain

When bicycle manufecturers and riders the world over were having trouble with their bicycle chains, which, in spite of all they could do, would wear and stretch, it was a Canadian who found a way out of the difficulty.

The Wilson Chain with which Red Birds are fitted

This Canadian was Mr. Wm, Wilson, one of the experts paid by this company to bring the Red Bird nearer a state of absolute perfection.

This invention consisted of a patent, whereby the centre part of the pin was hardened, giving the hardened steel pin. So we'll was this received that the largest chain manufacturing establishment in the world purchased the American I ght to produce it.
