THANKSQIVING DAY. For years there have been protests that Thanksgiving Day, nepelly observed late in November, was placed at too late a date, and that it was liable to be characterized by inclement weather, which meant colds or worse, or a day in the house, to the citizens who should have been enjoying a genuine holiday. The Government has decided to break away from the usage of its predecessors, and have fixed Thanksgiving Day for Thursday, October 19. This should be an eminently satisfactory date. About midway between Labor Day

BEARDMORE'S IMPROVEMENTS Their New Filtering Apparatus Leaves the Refuse Water Nearly as Clear as Crystal.

.it is a common saying here that Beardmore & Co., and their managers are never happy unless engaged with a large staff of workmen effecting extensions and improvements. If this be true they verily must have been extremely happy this year Improvements have been numerous and

extensive. The new pumping apparatus for water supply is about complete. It includes a powerful pump with a capacity of 800 gellons per minute, fed through a ten inch auction pipe, from a tank about 14x14x12 fect, containing 17,000 gallons. The pump has also two valves for fire hose connections and the other day threw atreams over the seven-story dry loft at the provisions of the Lord's Day Act in the tappery.

errction, and the walls of the new ware house at the G. T. R. station, will shortly begin to rise under the bricklayers' hands. But the most important work of the year has been the construction of the new filtering apparatus. This was completed a couple of weeks ago and is now in very successful operation. The work was a very large and costly undertaking, larger than any-similiar plant in Canada, but the result we predict will be satisfactory to all concerned. To take the discoloration out of the bed of the stream, after it has been in use for half a century by the tanneries without proper filters, is out of the question, and was not expected by the a uthorities; but the water passing into the stream now from the filtering bed is remarkably pure and free from any color or orier. To accomplish this very desirable and has cost the firm a summer's work with a large number of workmen and an King's New Life Pills. Thousands

There are two filtering beds each 285x51 feet con structed upon most modern plans, and here the final purifying takes place.
