Thanksgiving Day Next Thursday. The early date for Thanksgiving-19th October-is very generally acceptable, as an appropriate time at which the people are to give thanks for the blessings of the year. The crops will have been gathered in, the autumn foliage will be in all its many-hued glory, the "season of mellow added to principal without waiting for Pass | fruitfulness" will not yet have passed, Book to be presented. Any sum may be withdrawn by simply sending in a written order, with the Pass Book.

Winter will still be weeks away, and the causes for thankfulness will be visible in abundance.

Knox College Missionary Work. Mr. Beattie, of Knox College Students Missionary Society, preached both morning and evening in Knox Church last Sab bath. The claims of the society were interestingly presented. Twenty - eight young men from Knox College were sent out by this society to the sparsely settled sections of Ontario to minister to the settlers during the summer. The Christian Endeavor Society made a contribution to the Missionary Society through Mr.

Beattie. Don't Give Hoys Cigarettes. In law it is just as bad to give a bo under eighteen years of age cigarettes as is to sell them to him. Wm. Barman, a farm hand, who works near Stoney Oreck learned that Saturday morning, and the information cost him \$10. He was fined that amount by Magistrate Jelfs, he having been convicted of buying a package of "coffin spikes" at Culp's atore in Stoney Creek and giving them to John Langton, a fifteen-year-old cigarette flend. The Magistrate said that was the lowest fine he could impose according to law. The Magistrate requested the constables to summon every person they had learned of selling or giving elgerattes to boys .-

Band Competition at next County Fair. The Champion suggests the following:tion offer a prize of \$100 for a band competition at our next fair. The citizens would, we think, readily make up this amount. Have the competition open to town and village bands, and have it announced as early as possible so that the different bands may prepare for the event. We think such a prize would be worth competiting for and would certainly bring to our town a number of outside bands." The Champion's suggestion is a good one Acton Cornet Band will be on hand to secure the big plum, if possible, as it did on two former occasions, in the days when band competition was keen among the bands in the county and vicinity.

What the Brampton Conservator Man Saw on a Brief Visit to Acton. Mr. S, Charters, the genial and enterprising editor and publisher of the Conser-

vator, Brampton, took a walk about Actor last week, during a brief visit here, and has the following to say of what he saw and of the citizens he met :

Broddy, the Editor of the Conservato enjoyed a very pleasant drive to Acton and a visit to a few places of special interest in that unassuming, but very progressive village. After seeing the horses properly cared for at the excellent, well arranged and well managed hotel of Mr. Robert Agnew, a call was made at the glove works of Mr. Arnold, a thrifty looking concern that gives employment to about twentyfive hands. Here different lines of gloves belts, braces, etc., are made, under the personal appervision of Mr. Arnold, who has been engaged in this line since his boyhood having commenced the trade i England while very young. He has made

his own position and, we are told, has made it well. Mr. Storey, head of the glove works which bear his name, very kindly oscorted us through the extensive works of his firm. A four-story brick building, heated by steam and lighted by electricity generated on the premises by the company's own plant, is barely sufficient to accommodate the two hundred hands constantly employed-they are now working twelve bours a day-to meet the demands of home and foreign markets for the various lines of gloves, moccasins, satchels, &c., for which

the house is so justly famed. Beardmore's tannery, the largest in th dominion, gives employment to on hundred and seventy-five hands and being enlarged and improved from year to year. \$6,000 was spent in new buildings and siterations during the year 1899. Some idea of the extent of the business may be formed from a knowledge of the fact that \$90,000 is spent annually for Forest.

Acton is also the home of the member for Halton, and is justly proud of its distinguished townsman. David Henderson. M. P., is one of the ablest men in the parliament of Canada. His wide experience, breadth of view, and intimate knowledge of trade and the workings of the tariff give him an interested audience every time his voice is heard. He expects another, and a very lively, session of parliament before the elections. A brief call was made upon Col. Allen,

For several months shrewd investors have been putting their money into the shares Copper Mines. This is true not only of men with large amounts of money at their disposal, but also applies to those who have made a study of investments with a view to securing a large return for small investments. As high as Three and Four Hundred Per Cent.

has to our knowledge already been realized on some of these investments. The Americans were the first to make a specialty of Copper Stocks. They knew what they were doing, for the reason is not far to seek. Every copper mine in the world is at present taxed to its utmost limit to meet the growing demand for copper for electrical purposes. The reserve stores of copper are being depleted until it pays no longer, to use copper in some eastern countries as a coin. Copper has gone up in price from 9 to 18 cents.

The Supply of Copper from the Mines of the World To-day is only About 80 per cent. of

the Consumption.

That is the reason why finaciers have their engineers searching the four quarters of the globe for Copper Mines, and that is the reason the shares in promising copper companies are so easily picked up by investors. If you have any money to invest we would ask you to consider the shares of the Superior Gold & Copper Company, Limited. This Company owns and operates some valuable native copper properties. We are in a position to offer you a special opportunity in this stock which as an investment should give you a profit of at least

100 per cent. in Six Months.

### Jackets Capes. Because we buy direct from and

We have just opened three cases of Jackets, Capes and Costumes received direct from one of the foremost manufacturerss' in Berlin, Germany, the great Mantle Centre of the World. This is the fourth shipment of Ladies' Jackets and Capes received this season and another shipment is on the way, and will be to hand before the end of the week. response given to the opening of these goods has indeed been most gratifying and the sales are simply ahead of anything we have ever known. It's no trick to sell these goods, all we have to do is to show them, "the public does the rest," and the reasons are not far

FIRSTLY-We think we are stating the fact when we say that this season "our firm was the only one in Guelph" whose principal went direct to the manufacturer's in Berlin to make our purches.

SECONDLY—We buy these goods direct and in our own name, and without the necessary per centage which some of our competitors have to pay the commission houses through whom they buy. This makes a decided difference in our favor.

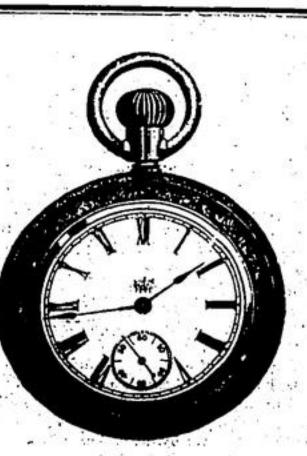

THIRDLY—Our buyer purposely went late to market so as to secure the very newest and up-to-date styles and fashions. It is well known that the fashions often alter very materially after the early lots are sent out, and that later ideas rule the correct style. We are showing the very latest that has been produced in styles that cannot be seen elsewhere in the trade, and our Garments are perfect pictures of beauty and style.
