

MARRIED.

Montreal—Contract at the residence of the bride's parents, Kaulis, Aska, on Wednesday, 16th July, by Rev. A. H. Hobson, Mr. T. G. French, Justice of the Peace, Government, deacon of David Cemetery.

DIED.

Prairie—In Memoriam, on Thursday July 23rd, 1901, Thomas Price, aged 83 years, died at his home, 100, Victoria Street, Toronto, Thursday, July 19th, Elizabeth Lidlow, sister of James Lidlow, in her 70th year.

The Action Free Press

THURSDAY, AUGUST 1st, 1901.

EDITORIAL NOTES.

There are at present three vacancies in the House and this is the House of Commons. In the House there is one vacancy in Ontario, another in Quebec and a third in Nova Scotia. In the Commons three in Ontario, one in New Brunswick and one in Manitoba.

The Action Free Press, Milton Champion and Oakville Star, respectively, have recently entered upon another year of publication. These three papers are a credit to the towns in which they are published, and also the country. We wish the editor of each of the three heralded institutions journals continued success and prosperity. They certainly deserve it.—Burlington Gazette.

At the annual meeting of the Grand Lodge, of the Orange Order, in Toronto last week the proposed change in the constitution to exclude hotel-keepers from membership produced a spirited argument, but the resolution was defeated by a vote of 90 to 27. A motion of motion was immediately given that the master would be brought up at the next meeting of the Grand Lodge.

It is very evident that if the Curfew by-law is to be given any further consideration by the council, the supporters of the curfew must bring new evidence to bear upon the members, and perhaps repeat their eloquence of a few months ago. It is, no doubt, true that evidence can be obtained from the eight municipalities of the province where the curfew by-law is in force, to prove its value as an aid to the moral welfare of the rising generation. Theons now rest upon those desiring the by-law enacted here to provide such evidence.

The council is considering the advisability of adopting the plan in vogue in many municipalities of allowing a discount of five per cent to all ratepayers who pay their taxes promptly on the dates fixed for their payment. This has been found to work satisfactorily in numerous municipalities throughout the province. It would be a good and just payment and ensured the receipt of taxes at a much earlier date than otherwise and consequently reduces the expense of interest being paid for the temporary loans necessary to provide for current expenditure. The plan is worthy of a trial by our authorites.

The statement will be good news to ratepayers, and reflects very creditably upon the present council; that there is every probability that Action's rate of taxation for the present year will not be increased. It was probably generally conceded among the members of the council up to the last meeting, that in view of the necessarily increased expenditure for the new brick stack at the power house, the increased sum required by the Board of Trustees and other enforcement expenses of the curfew by-law would be between \$20 or \$25 mill. It was shown however, at the meeting on Monday evening that the Committees on Finance, having gone carefully into details in the estimator for the year, were able to announce that with a continuance of the economy which has characterized the expenditures thus far during the year, coupled with the increase of the assessment to \$214,000, a rate of 30 mills, the same as last year, would be sufficient to cover all outlay for the year. The rate will be struck at the next meeting.

The Burlington Gazette is advocating permanent pavements for that town. The Gazette shows that in addition to cement walks, which the citizens of the walk is considered, is much less. According to the Gazette's investigations, plank walks at the present high price of lumber, cost seven cents per square foot, after which the cost of repair will equal the expenditure for the removal of the walk. The best cement walks are being laid at 10 to 12 cents per square foot and they are expected, whether properly put down, to last at least a quarter of a century. Our Burlington contemporary advocates the systematic removal of plank walks with out cost of current expenditure. Action tried this plan for three years, but all could not be removed for 60 years to replace the plank walks with cement. We now have the legal enforcement by law in force and the prospects are that in two or three years all the walks on the principal streets will be laid with permanent pavements.

The Montreal Star is publishing a series of articles on New Ontario by Mr. V. H. Clerge, which gives evidence of the importance of that extensive section of our province and manifest the loyal interest of this enterprising manufacturer and prospector. Mr. Clerge shows that New Ontario is about three times as big as Old Ontario, that it has immense areas of fertile lands, rich mineral valuable timber and a favorable climate. He goes on to show that the people may learn three great lessons from the story of the wonderful industrial evolution of Haut St. Marie. The first lesson is that Canada is rich in natural resources and that American capitalists are doing at Haut St. Marie.

He goes on to show that the people may learn three great lessons from the story of the wonderful industrial evolution of Haut St. Marie.

The Lord's Day Alliance complains that the second lesson is that there is more than money to be made by selling Canadian material to the United States and other countries in crude form. The third lesson is that it is bad policy to buy in foreign countries anything that can be profitably made at home. If Mr. Clerge's policy of never going outside Canada for anything that can be obtained in the country had been followed in the development of Canada from the earliest times, this country would be "beyond as wealthy as any country in the world."—Carried.

A 20 MILL RATE.

Will All Probability be Possible for the Present Year?

WHICH CHIMNEY FOR POWELL HOUSE.

At the regular meeting of the Council on Monday evening the Committee on Finance in the course of conversation volunteered the information that after going carefully over the estimated receipts and expenditures for the year they would be allowed to spend.

That was a very welcome news to the members who had originally thought a 22 or 23 mill rate would be necessary.

The Chairman of the Committee on Finance and Works demurred a little on the ground that the amount being allowed by his committee in the estimate was inadequate, but when it was shown that 12,000 or 14,000 feet of permanent pavements were likely to be laid on the local improvement plan, and his committee was consequently having much more than the usual sum expended for improvements of the streets, he good-naturedly acquiesced and agreed to do his best under the circumstances.

An interrogation by Councillor Jeanes respecting the payments on account of the electric lighting plant this year, brought out very satisfactory information. Chairman Henderson replied that up to the present date the receipts this year have been \$1645, for current, supplies, etc., and that the payments less salary and depreciation, were \$1265.57. The Committee had bright hopes, he stated, that the total receipts for the year, and expenditures, including salary and annual payment of debentures, would balance. The introduction of the motor-aisle and gas was not contemplated by increasing number of users of light both tend to increase the rates, and the prospect for future rates was accordingly assuring. It was felt "safe" to state in this connection that to above figures there is no credit given in the revenues for street lighting, if then, the plant's revenues from its patrons pays all claims, the corporation is having the streets lighted free of cost—an estimate saving to the municipality by owning its own plant and franchises of \$600 per annum.

Council met on Monday evening in regular session. Members all present, the Mayor in the chair.

The Committee on Finance presented their twelfth report and recommended payment of the following accounts:

H. W. Chisholm & Co., coal 10.00
United Motor Co., supplies 25.00
Motorcycle, telephone, etc. 18.00
General Merchants Co., supp. 10.00
George Wordsell, work on streets 5.00
H. J. McDonald, work on streets 5.00
John Winstone, repairing chimney 8.15
Hart & Hiddle, stationery 8.77
A. T. Brown, supplies 9.30
Chas. Brown, work on street 1.00
Stephen Hosell, work on street 1.00
\$190.67

Moved by H. Swackhamer, seconded by H. Jeans, that the report of the Committee on Finance, just read, be adopted.—Carried.

The Clerk read a communication from the Board of Public School Trustees asking the Council to provide by taxation the sum of two thousand dollars for school purposes for the current year.

Moved by A. H. Henderson, seconded by H. D. Graham and is hereby appointed Inspector of pavement works to be constructed as local improvements for this corporation for the year 1901.—Carried.

The matter of the erection of a new brick chimney was again considered and it was reported by the committee that a suitable chimney, first-class and very respect, could be had for \$1000 less than figure that was estimated at last meeting.

Moved by Goo. Hyndes, seconded by A. Henderson, that the Council should accept the offer of C. H. Dafoe, of Galt, for the building of a new brick chimney at the power house.—Carried.

Councils' Resolution—What about this Curfew by-law? I have promised to bring the matter up every night until it is either passed or on the matter is dropped.

Revs. Williams stated that he was in Dundalk last week and was introduced thereto that the Curfew by-law had died a natural death. The discussion ensued.

Moved by George Hyndes that the Council now adjourn.

Council adjourned at a quarter to ten.

Lord Selkirk, in his speech in the House of Lords last week in support of the bill, said, that the tendency of the bill is to increase Great Britain.

He also said that the bill is to be introduced in the House of Commons.
