**\$75 TO SELL CIGARETTES.**

The By-Law Passed at Monday Evening's Council Meeting.  
**THE AUDITORS' REPORT PRESENTED.**

The Council met on Monday evening in regular session. All the members in attendance, Rev. Knechtel in the chair.

The event of the evening's proceedings was the final reading and completion of the cigarette by-law. As the resolution below will show all the members of the Council put the seal of approval upon the by-law. With the usual support with instructions to the municipal officers to enforce the law, and with a large majority of citizens in favor of the abolition of the cigarette, the well should now be very satisfactory and unobjectionable.

The report of the Auditor presented at the meeting of Monday evening, presented the Auditor's report of the financial condition of the City of Acton for the year 1922. The Auditor's report was presented at the meeting of Monday evening in regular session. All the members in attendance, Rev. Knechtel in the chair.

**A GOOD FARMERS' MEETING.**

Profitable Address and Discussion of Value to Farmers, in the Town Hall Last Evening.

**MANY PRACTICAL SUGGESTIONS.**  
The meetings in the town hall last evening, under the auspices of Halton Farmers' Institute, were repeated with interest to the practical farmer who wishes to learn new methods and receive suggestions, the result of experiment and experience by up-to-date farmers and professors of agriculture.

Mr. Geo. Gable, President, Milton, occupied the chair, and the attendance at both meetings was satisfactory.

After a few minutes' address by President Gable, Prof. G. E. Day, of the O. A. C., Guelph, proceeded with his address on "Stock Feeds and their uses," which he aptly illustrated by a carefully prepared chart. There are certain substances in foods that go to build up the system of the animal, and when these are fed in the proper proportions the animal will grow and thrive. Natural pasture grasses contain these substances in their proper proportions and form what is called a well-balanced ration. In feeding stock one should be able to combine the different foods in their proper proportions to produce muscle, bone and fat in the beef animal, and the same ration will produce the best milk in the dairy cow. Clover hay will cure a lamb as good as grass, only it is not quite so palatable to the animal. Green corn or silage is not well balanced clover hay, but when fed with clover and some hard grain, makes a splendid cheap food. Mangos and turnips contain about 90 percent of water, but they make the food very palatable and help to make the animal healthy. Mangos are best for milk production, and sugar beets for fattening cattle. Feeding corn is very important in feeding hogs, and with the proper proportions of shorts or chipped grain, will make a first-class quality of bacon. Shirts are much better for hogs than bran, and best mixed with corn and shorts. Excellent food. Oats are good for the dairy cow but not so good for the production of milk. Corn is best for fattening mature animals, and oats for young growing cattle, especially when mixed with bean and a little oil cake—about half a pound of the latter a day for calves.

J. I. Warren, secretary of the Institute, explained with the use of a chart, what the seed department at Ottawa are doing in the interests of farmers in the way of showing the necessity of being very particular in the purchase of clover or timothy seed. From about 200 samples of seed examined last year, purchased from all parts of the Dominion, it was seen that only one or two were from first-class seeds of different kinds. Out of 25 samples purchased in Ontario only one was from first-class seed, the other 24 containing from 10 to 100 percent of weed seeds. It is found that the number in a bushel, just multiplied by sixty and they will give 2,210,000 seeds that will give at the rate of from eight to nine dollars a bushel. A great number of the samples contained varying quantities of white clover, alfalfa, timothy, clover, and other weeds. Canada thistle, lamb's quarters, lady's thumb, green foxtail, false flax, etc. Most of the clover seed sown here in Ontario, but the trouble in that nearly all of the re-cleaned seed is exported to Europe and other countries, and only the second and third grades are sold by the local seed dealers. We think it would be a step in the right direction if some legislation could be secured making seed dealers responsible for the purity of the seed they sell.

At the evening session Prof. Day spoke on "The conservation of soil moisture," and was listened to very attentively. Some of the ways mentioned were: Keeping the soil well supplied with humus by the application of farm yard manure, or by plowing down green crops such as clover, peas, etc.; covering being one of the best in hood crops. Keep the soil well cultivated at the surface to prevent the evaporation of moisture.

G. R. Cotterell, Milton, gave a short address showing the necessity of producing a first-class quality of what the farmer has to sell, and to place it on the market in good order so that they can maintain the good name which has for his products in foreign markets.

G. C. Crowell, Superintendent of Guelph, was the next speaker and was listened to with great interest. Mr. Crowell made reference to the abilities of young Canadians, how, after being educated for the professions in the past, were forced to seek other countries in order to preserve a livelihood. The farmer, he said, made mistakes in educating his children for the already overcrowded professions. In law, after an apprenticeship of from 6 to 8 years, students had to accept positions in law offices at from \$800 to \$1000 a year; and upon starting a practice for themselves had again to be assisted by the parents until such time (probably four or five years) as their business enabled them to support themselves. On the other hand, if only one quarter the amount necessary to educate a young man for a profession was used in starting the young man on a farm, through his apprenticeship in the country, he would own a farm and be an independent position. In speaking of the over-crowding of the professions, he stated that 25 qualified physicians had volunteered to go to South Africa with the Canadian contingent, and advertising for a school teacher at a salary of \$250 a year (about the same as a farm laborer, who gets his keep in addition), received 73 applications for the position.

As a remedy, he said, we must go back to the land. Conditions will never more favorable to the farmer than they are at present. In Ontario the common sum of \$1,000,000,000 was invested in farms, yielding interest to the amount of \$25,000,000 a year.

After speaking to some length on agricultural education—the advantages to be obtained thereby, and the

**Pains in the Back**

Are symptoms of a weak, rapid or stagnant condition of the kidneys or liver, and are warning signs of a hazardous neglect, so important to a healthy action of these organs.

It was taken ill with kidney trouble, and became so weak I could scarcely get around, and my back ached so much that I could not sleep. I was advised to try Hood's Sarsaparilla. After the first bottle I felt much better. After the second bottle I felt as if I were a new man. When my little girl was a baby, she could not keep anything on her stomach, and we were for years suffering with the same trouble. Hood's Sarsaparilla cured us both.

**Hood's Sarsaparilla**  
Cures kidney and liver troubles, improves the back, and builds up the whole system.

**HOOKWOOD.**  
Special services are being held in the Epiphany Church in which the pastor is being assisted by Mr. Robert Burgess. An increased interest is being manifested in the services.

Little Duncan Ellis is sick with pneumonia.

Master Oliver Ford is seriously ill with a trouble, some of the symptoms of which resemble that of lockjaw.

On Sunday next, March 15th, the service in the Methodist Church will be held at 11:30 a.m. and 7:30 p.m. Rev. A. S. Boyd, M. A., will preach.

**CREWSONS CORNER.**  
Wood bees, a common pest of general preparation for spring work are the order of the day.

Mr. J. Walker's sale on Wednesday last passed off very successfully. The price was high; the sale amounting to over \$2,500.

The weekly prayer meeting was held on Tuesday evening this week. An account of the anniversary services in Eden Mills Methodist Church, the service here next Sunday will be at 11:30 a.m.

Mr. A. Beatty left on Monday for Milwaukee where he intends visiting his brothers, after which he will return to his home in British Columbia.

Quite a number of our citizens have been on the sick list, but are getting better.

The Line Kites have started at Dolly Varden and all hands are at work.

**WEEK LUNGS.**  
Made Sound and Strong by the use of Dr. Williams' Pink Pills.

Weak lungs mean weak health, continual coughs and colds—tremulous grip and hemorrhoids, rheumatoid pneumonia or lingering, hopeless consumption. Weak lungs are due to weak blood. The one sure way to strengthen weak lungs is to build up your blood with Dr. Williams' Pink Pills. Every dose makes rich, red blood, and every drop of rich, red blood adds strength, vigor and disease-resisting power to weak lungs. Thousands of weak-lunged, narrow-chested men and women have been made sound, healthy and happy by the use of Dr. Williams' Pink Pills, and they will do the same for you. Mrs. T. D. McLaughlin, Winthrop, Me., says: "I contracted bronchitis and lung trouble. The best of doctors and many different kinds of medicine failed to help me, and my lungs were fast going into decay. I was forced to take to bed, and felt that only death would relieve me. My brother urged me to try Dr. Williams' Pink Pills, and to place him to a practice for themselves had again to be assisted by the parents until such time (probably four or five years) as their business enabled them to support themselves. On the other hand, if only one quarter the amount necessary to educate a young man for a profession was used in starting the young man on a farm, through his apprenticeship in the country, he would own a farm and be an independent position. In speaking of the over-crowding of the professions, he stated that 25 qualified physicians had volunteered to go to South Africa with the Canadian contingent, and advertising for a school teacher at a salary of \$250 a year (about the same as a farm laborer, who gets his keep in addition), received 73 applications for the position.

As a remedy, he said, we must go back to the land. Conditions will never more favorable to the farmer than they are at present. In Ontario the common sum of \$1,000,000,000 was invested in farms, yielding interest to the amount of \$25,000,000 a year.
