Running a Newspaper. Running a newspaper is just like running a hotel, only different. When a man goes into a hotel and finds something on the table which does not sult him, he does not raise hades with the landlord and tell him to stop his old hotel. Well hardly. He sate that dish to one and wader into the many dishos that suit him. It is different with some newspaper readers. They find an article occasionally that does not suit them exactly and, without stopping to think it may please hundreds of other readers, make a grand stand play and tell the editor how a paper should be run and what should be put into it. Such people are becoming fewer every year.
