THE REASON

Why was St. Androw chosen as the patron saint of Scotland? This question has been asked many times, but the archdencon of whom Doan Hole tells may be considered to have discovered the most satisfactory solution of the problem.

"Gentlemon," said he the was speak. ing at a St. Andrew's Day banquot at the time), "I have given this difficult subject my thoughtful consideration, and I have come to the conclusion that Ht. Androw was chosen to be the patron waint of Scotland because he discovered the lad who had the leaves and fishes.

It is well to have on hand a remedy, simple, effective and easily applied, for mosquito bites, insect stings, sores, bruises, sunburn, and injuries to the skin, and forty other ailments not always dangerous, but which can be cured by outward application. Such a remedy is Davis' Menthol Salve(TheD.&L.), which comes in tius for 25 cts. at druggists.

THE BILENT PARTNER

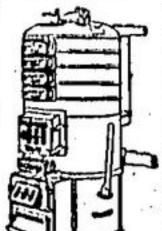

A novel kitchen shower for a brideto-be is contained in WOMAN'S HOME Companion: "The invitations were obliged to be verbal, as they suggested contributions for the necessary articles required for the Silent Partner, whose needs must be definitely considered. The results prove no end of fun.

"The skeleton of the Bilent Partner was found to be a new broom. The bend, made of paper, was tied to the top of the handle, with a natural-looking face drawn upon it with pen' and ink. Helow the head, in the place where shoulders are expected to appear, a piece of lath about one and one half foot long had been palled to the broom-handle.

"Then with newspapers and twins a fairly well-shaped body was made. To each shoulder was fastoned a pancakod shovel and fire-shovel, the spoons for arms, and those were govered with ten-towels planed on in the form of ed her shoulders as a fische and fastoned in front with a cooky-cutter for a

A THOUSAND DAY CLOCK A twentleth century clock, which has neither pendulum nor tick, nor escapement, and which runs for at least 1000 days without Intermediate winding, is the achievement of the clock-maker's art which Mr. Higismund Kutnow has had the honor of submitting to the King at Buckingham Palace.

Mr. Kutnow has christened the invention the Rureka Ricetric Clock. Recently he explained its mechanism. The usual apring is replaced by clostrical impulse, and the dist hands are moved by direct contact with the clootric current. This is given by a single dry cell battery, placed incide the clock, and it works independently of any other electric installation. An ordinary shilling battery, which can be bought at an electrician's, is guaranteed to drive the clock for the 1000 now states has been running for more than three years, and shows no indi- The T.
