#### EDITORIAL NOTES

The Canadian Magazine for Septem ber contains an article entitled "Can adaland Greehland," by Rebert Stein. of the United States Bifreau of Statis tity. The author advocates the peace ful acquisition of Greenland, from Donmark in exchange for some farflung British colonial territory. That in brief is Mr. Stein's offset to the present ill-feeling between England and Germany, and it is a proposition that is well worth reading and con-

The Department of Statistes at Ottawa has issued an estimate of the coming wheat crop of the three western provinces. It predicts that the total yield will be in the neighborhood of 157,000,000 bushels, which is the Carroll, 3 b. highest estimate yet published. Ordinarily the departmental estimate McGunnigle, c. does not err upon the side of optimism, but in this instance general opinion in the West seems to favor an estimate of about 130,000,000 bushels. This Clark, l. f. means by far the biggest crop in the history of the country. Harvesting is now in full swing, and conditions are splondld nearly everywhere. .

Those who blandly and completent ly congratulate themselves on the enlightenment and general spread of knowledge evidenced in this age may find food for thought in some pithy and forceful statements made in Physical Culture Magazine for September. It's editor, Bernarr Macfadden is far from believing that our present day educational system is perfect, and he strongly denounces modern education as falling to provide instruction on the most vital subject of human existence. His pungent discussion of day, Sept. 4th, the date for the former this point, and other questions of public interest are well worth the reading.

It really does appear that County Councils are under no obligation to see that the incorporated towns and villages are treated fairly under the Good Roads Act. Reeve Nixon of Trafalgar has discovered a most unreasonable clause in the statute which says substantially that the County Council has the right to designate cortain streets to come under the Good Roads by-law; they have a right to let contracts on these streets, but are under no obligation to provide for their payment. Under the uniatour fashion of financing followed by our County Council, Georgetown's taxes under the Good Roads movement are Increased from \$500 to about \$130. And yot the County Council, under this foolish statute, need not pay for a dollar's worth of county work within the villages or towns, and there are actually in the County Council men unfair enough to decline to make ever a moderate grant for this purpose,-
