"The yield is even better than was anticipated and there is little doubt that it is record crop for the West. The re markable spell of continued fin weather with no rain has been a boom to the West, as with the shortage of help there would have been otherwise heavy losses. But Jim was such a whole souled, honest, slow minded chap he never could do a thing tactfully nor hide the real import of his meaning. Fall Millinery Opening

Our Showing will Reveal the Style Tendency in Autumn Hats and Wear Things.

Opening Days September 15th to 18th

A style not in accord with fashion's dictates is not right, and what is not right is not style. Every Hat and Garment we offer is right; hence stylish. And so best for the weater. In fact, our style supremacy in these lines is generally recognized by the best dressed women in this locality, and this reputation will be enhanced by the high class goods we offer this season.

Paris advices prove that the large hat will have a great vogue this season. Crowns are large but of medium weight. Brims have a tendency to a high roll at the left, with the Marquise as the most prominent. Turbans and Toques of larger than usual shape are also in high favor.

In ready to wear things the showing is complete. Customers can rely implicitly on the correctness of our display. Its diversity also is worthy of commendation. Never so many good styles—never such spleidlid values. A visit to our Ready-to-Wear Section and Millinery Department will prove very interesting at this time. Style questions can be quickly settled at this initial display of the new Fall Modes.

Visitors to the Fair are especially invited to the Autumn Style Show. It is being held on the and floor. and you are welcome to come and view the new things. There will be no obligation to buy,
