Regular Habits

An Absolute Necessity For Good Health

You might as well expect to find a man or woman healthy with constipated bowels as to find a city healthy when its sewers are blocked with refuse. Nature demands that the indigestible food and waste matter which collects in the lower bowels shall be got rid of at least once in twenty-four hours. If this is not done it decomposes, filling the bowels with poison, which is taken up into the blood and carried

all through the body. Naturally, this poison affects the work of every organ. The liver is deranged, digestion is upset, and biliousness, headaches, lassitude and dizzy spells follow. Literally millions of people suffer these results of constipation without realizing the cause, or doing anything to remove it. Vet it can be removed, easily and with certainty, by using Dr. Morse's Indian

Root Pills. Take, for example, the case of Mr. George Andrews, Halifax, N.S., as he himself describes it : "For many years I have been troubled with chronic constipation. This ailment never comes single handed and I have been a victim to the many illnesses that constipation brings in its train. Medicine after medicine I have taken in order to find relief, but one and all left me in the same hopeless condition. At last I read about these Indian Root Pills. That was indeed a lucky day for me, for I was so impressed by the statements contained therein that I determined to give them a fair trial. They have regulated my stomach and howels. I am cured of

Dr. Morse's Indian Root Pills were first taken to cure constipation nearly a hundred years ago, and during the last half century they have been very extensively and very successfully used throughout the world. They are entirely vegetable in composition and do not sicken, weaken or gripe like mineral purgatives.
