There is only one way to care deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous links of the Musicobian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed. Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; blue neares out of ten are caused by Calarris, which is nothing but an inflatued condition of the mucous surfaces.
