Frost & Wood Scuffler

This is No. 1 Scuffler with 7 Standards 10 Steels

KNIVES CUT WHEN WHEELS START

No drag start needed with a No. 8 Frost & Wood Mower, because we build our mowers with the internal gear inclosed like the external variety. The cutting knives work in the usual way, but the driving gear is entirely inside the frame, where it is clean, safe and durable. They both cannot get out of order. The internal gear is the only one that will run for years without oiling. Our mowers have the only reliable device for taking up lost motion. Our cutting knives are the only ones that can be sharpened without removing them from the machine. They are the only ones that can be set to cut close to the ground. They are the only ones that can be set to cut high. They are the only ones that can be set to cut any length of grass. They are the only ones that can be set to cut long or short grass. They are the only ones that can be set to cut thick or thin grass. They are the only ones that can be set to cut wet or dry grass. They are the only ones that can be set to cut tall or short grass. They are the only ones that can be set to cut fine or coarse grass. They are the only ones that can be set to cut level or uneven ground. They are the only ones that can be set to cut straight or curved lines. They are the only ones that can be set to cut any shape of lawn. They are the only ones that can be set to cut any size of lawn. They are the only ones that can be set to cut any kind of grass. They are the only ones that can be set to cut any condition of grass. They are the only ones that can be set to cut any time of day. They are the only ones that can be set to cut any season of the year. They are the only ones that can be set to cut any year. They are the only ones that can be set to cut any decade. They are the only ones that can be set to cut any century. They are the only ones that can be set to cut any millennium. They are the only ones that can be set to cut any eternity.
