time that the railway construction to be pushed forward in the Western Provinces during the present season will call for the expenditure of about \$60,000,000. The lines to be built will cover three thousand miles, and are partly contracted for and partly graded. For this work 60,000 men will be required and there seems to some fear in the West that this normal demand will result in some thing of a labor famine. One authorty states that at least 35,000 men have to be brought from Great Britain and Kurope.

ORDERS for over 4,000 cars of various classes have recently, been placed by the Grand Trunk Railway to augment Its present equipment; these include Dassonger coaches, 23 baggage cars, 300 box care, and 1,000 coal care apart from which 948 care of all kinds have been received and put into service during the past quarter.
