VALUE OF AN INDUSTRY

An interesting and accurate calculation has been made of what an industry employing 1,000 hands means | he is getting a good many sheets and to a community.

It increases the population by 5,000

The assessment is increased by \$000. It pays out annually in salaries \$550,

The annual expenditure in food \$55,700 in butter, and \$27,000 in eggs. Summed up this means that an industry employing 1,000 hands is worth \$221,600 to the farmers of the district The expenditures in clothing would

With the annual payment of taxes added to the total expenditures or buildings, food and clothing, you have in all \$2,418,850 turned into the town in one year through the coming of one great industry. In conclusion' one may again note the prodigious results which are affected by the presence in Canada of some 435,000 artisans. In round figures these men would mean at least \$1,056,322,250 to the Dominion An industry employing 1,000 hands may be regarded as a large one, but the same percentage of results would follow in larger or smaller plants, so

SUFFERED TERRIBLE PAINS OF INDIGESTION.

MILBURNS LAXA-LIVER PILLS Mrs. Wm. H. Mackwen, Mount Tryon PRY writes willow more than a year I suffered with all the terrible pains of indigestion, and my life was one of the greatest misery. It did not easie to make any difference whether I ato or not, the pains were always there, accompanied by a severe bloating and beiching of wind. I did not even get relief at night, and sometimes hardly got a bit of sleep. In my misery I tried many remedies said to cure indigestion, but they did me not one particle of good, and I fully expected I would always be afflicted in this way. At this time my brother came home on a visit and urged ma to try Milburn's Laxa-Liver Fills, and got me a few visit. By the time I had faken one visit I began to improve, and could say with some relieb. I was greatly cheered, and continued taking the pills until all traces of the trouble had disappeared, and I could once more out all kinds of food without the slightest incorrentence. I am so fully convinced of their virtue as a family mattered in them.

THE PRINTED LETTERHEAD

Printed letterheads and envelopes are travelling advertisers. When letter comes it makes a bla difference If it has a printed letter head and envelope. It looks like business and to business of the best kind.

The farmer needs such printed let terheads. There should be something for sale on every farm, and the letterhead can be made to advertise it very cheaply. It will also be found that the printed letterhead will have quite an influence on the person himself. The more he sees it the more pride will be taken in keeping up the quality of the article for sale.

It is not accident that business men in all lines use the printed letterhead. They have found that it is a good business proposition. Those farmers who have tried it have found it both practical and a source of pride. The cost will not be so buch more than the plain paper. It may seem a little large but then one wants to remember that
