To Giffard deatiny had been neither conspicuously kind nor actively cruel. : It had simply passed him by. But the day came at fifty-five when it dealt him a polguant stroke. There are men to whom fifty rings the death knell so far as earthly hopes are concerned, to whom grey hairs, slightly stooping shoulders decline of the vivid forces of life, mean the end of most things that men prize. When it happens (and that is very often) that they occupy subordinate positions, they live in terror of the day when the sentence sitall be read, when they will etep down, perhaps with a quarter's

salary in lieu of notice to make way for younger men. It was on the eighteenth day of October, in a certain year not we long ago, when this happened to Philip Giffard. He could not complain of any bardship : he had occupied a fair ly responsible position in a business house, where he had earned the com fidence of his employers. They had frankly told him on regretting the necessity which cannot them to die keen and cutting times what are men

Not a word of sympathy or wifely companion or comradeship; only blame dipped in gall! Giffard slipped gladly from the house at length, and took her in his arms, but precently she was relieved to find himself under the kindly stare. He did not minimize the situation, nor fall to blame bimself for the non-possession of the qualities which in other men make such polg nant bours impossible. But secret beart there was no fear.
