EDITORIAL HOTES

THE GENERAL CONFERENCE OF the Methodist Church of the United States decided last week, in quadrennial eccaion of Minneapolis, to retain the rule against dancing, card playing and other questionable amusements.

THEOBYRADILY INCREASING ACCOUNT modation for the shipment of grain and other products in the West is shown by the statistics of wheat inspections at Winnipeg for the month of April of this year. During that time 13.302 cars were received and passed upon. During the same month last year inspections totalled 7,061 cars, this year showing an increase of 6,301 cars or very nearly one hundred

THE PIONEER, of Toronto, says: "Our Michigan correspondent writes: More complete reports from the twenty-five countles that voted on the Local Option question in April show that the net majority in favor of Local Option is not far short of 5,000. It is hardly probable that the Michigan Brewery Association or the Saloon Bonding and Surety Company will find anything enjoyable in this result. Home counties were voted "dry" at the last election which will probably not be contested again for many years, but there is not a county in the "wet" column that ever has been "dry" that will not be persistently contested until it is added to the "dry" list and remains there.

DEATH OF AN AUTON PIONEER Mrs. Stephen Coon Passes Away Ten Days After Her 85th Hirthday

Mrs. Stephen Coon, who was a resident of this vicinity for many years. died at her home in Guelph last Thursday, after a somewhat linguring illpees. The funeral was held to Acton on Saturday afternoon. Upon arrival of the 8.35 train the cortege proceeded to the Baptist Church, where Rev. Mr. Burrell conducted a very comforting service. The remains were then conveyed to the family plot in the old Worden burying ground at the corner of the Acton crossroad and the fifth line. Here her husband and parents and numerous relatives are resting. Mrs. Coon, whose maiden name was Deborah Worden, was the daughter of the late Samuel Worden, and was born in Nova Scotla. They're off ! The first of the thirty games arranged in the schedule for the season's series of the Acton Church Base Hall League was played on Saturday afternoon. The Anglicans and Presbyterians were the contestants. There was a very gratifying attendance and a manifest interest which 1919 precages a cordial support of the ecclesiastical series during the season. But to get down to the game. The Oatmealers went to bat and started things off rather hasty, scoring six runs in the first laning. MacLean was hit very hard, Heavy Smith connecting with one that sent the ball to the other side of the race course and geting a homer. Beardmore out in right field was certainly kept busy chasing the numerous long drives. This first innings seemed to take the gipger out of the Auglicane and when they came to bat they failed to scory a single run. The Presbyterians made another sun or so and then the Anglicans soored a

UMDER VERY HEAVY PENALTIES Owing to the light points crop in Canada last year, importations of potatoes became necessary. were intended for table use only, but some are preparing to use these inported potatoes for seed.

For this reason the Department of Agriculture at Ottawa deems it advisable to warn potatogrowers against the use for seed of potatoes imported from the British Isles or other Kuropean countries. Not only has it been found that European varieties do no yield as well as Canadian, but the very destructive and communicative disease known as potato canker has been discovered in these potatoes, and the greatest care is necessary to prevent its spread in Canada, which in this country would be a national calamity. Canada's potato crop is worth from \$35,000,000 to \$50,000,000 annually, and every grower should endeavor to prevent the introduction of the most dangerous potato discuse referred to

It has now been decided to rigorous ly proceed against any person using such imported potatoes for seed, as under the Destructive Insect and Pest 'It shall be illegal to sell, offer for

sale, dispose of in any way, receive or use, for seed purposes, any potatoes imported from Kurope. 'Every person using for seed other potatoes than such as have been raised by himself must obtain, preserve and exhibit on demand, previous to planting, a certificate from the seller or his

agent stating that the potatoes to be used for seed have not been imported from Europe." 'Every person who contravenes any provision of this Act brany regulation made thereunder, shall be liable, upon summary conviction, to a fine not exceeding one hundred dollars, or to imprisonment for a term not exceeding six months, or to both fine and imprisonment. Any vagetable matter Imported or brought into Canada contrary to this Act, or to any regulation

made therounder, shall be forfeited to the Orown.' In view of these provisions it may be pointed out that should the disease be discovered subsequent to the Issue of this circular in any field or farm. the farmer or grower on whose land it is found will be asked to furnish evidence as to the origin of the potatoof used for seed. If no entisfactory and Methodist expected their first try- care has been exercised he will not only render himself liable to fine or im-

It may be stated that up to the presplenty of excitement for the lovers ent Canadian soil is free from this disease, which, as is well-known, has The clergy of the town were there defied every measure directed against full force: Rev. Theeffort heeded to keep our soil free from this most injurious disease, which may lurk in practically every potato, is very small. All that is pecessary is that our potato growers exercise some little care in the selection of their need. The result of carelessness in this small matter at this present moment of planting time, is almost certain to effect irreparable injury to our exceedingly valuable potato growing industry, to say nothing of the millions of dollars it is practically certain to cost in the future to control the disease, when once de tablished.
