THURSDAY, SEPTEMBER & 1913 CONTRACTOR OF STREET, BETON JAISOTICE

THE BALLOT STUFFER who was giv on elx months for his action regarding the recent Hydro-Electric by law in Welland undoubtedly deserves aver minute of his sentence. But nothing short of a century of hard labor is the rightful due of those who used him as their tool. -Georgetown Herakl.

THERE IS a commendable variety of matter in the September Canadian Magazine. 'The Mystery of Edward Blake" is the title of an interesting essay on several aspects of this great Reform leader in Ontario. There are as well several other special articles and interesting illustrations, and reproductions of sketches in charcoal by

THE PROVINCIAL OFFICERS of the Liquor License Department evidently mean business in the matter of punishment of offenders who violate the law In Local Option territory. At Cobalt and South Lorraine ten opavictions were registered on Tuesday with Provincial Inspector Morrison, who was here with his officers in the Dynes case a few weeks ago. The fines ranged from \$100 to \$800 each, and in one once the illegal dispenser of liquor was sentenced to gaol for twelve months.

BOME OBSERVATIONS

On Tuesday evening of last week the writer of these possions) notes was passing at the crossing of Mill and Elgin Streets and was somewhat surprised to see quite a number of men standing at the Baptist Church corner who evidently belonged to some of the European nationalities now represented in the community. The circumstance, however, was explained by the account in the Fans Panes of the meeting beld in the church mentioned, in the interests of the strangers from abroad. The meeting, and its purpose and the conversations reported must surely command themselves. to all thoughtful citizens.

For some time there has been much desultory convergation held by helpfully disposed citizens as to the peculiar situation arising from the presence of these polygiot arrivals from so far. That it is likely that these people are to be here for some considerable time seems evident, and while we can understand neither their language, nor, largely, their habits and principles, it, however, must surely be lucumbent that some sort of kindly feelings be sogeodered for and toward them, if the people of a Christian community are to maintain their privlieges and obligations as such. Large sums of money are forwarded by the churches of the community for Christ. ian helpfulness to people of different nationalities who are without our privlleges, but when people of distant lands come amongst us, surely, by parity of reasoning, the same principles should apply. While at the inception of the Ohristian propagands the direc- | bachelors, but little is ever said of the tion was to go to the uttermost parts communities wherein matrimony is was also to be included.

To start with, the desire of our stranger brothron for a night school in order to learn the local language le surely a longing that should be met in some way, as one which will be means of reaching the sympathies and affections of these people. One of the first things in fortige mission work is said to be the using of the avenue of language as an approach. Further more, the interest taken in such studies, provided by kindly disposed citizens, will so engage the minds that are in almost enforced inactivity, that perhaps outbreaks of a serious characher might often be avoided, which by brooding in localiness might result.

The redex influence on our citizens who would interest themselves in such work would be very salutary. It is an acknowledged principle that what is exercised grows, and the exercise of philanthropic spirit will like mercy be twice blessed." The people of this community have often discussed schemes of heinfulness, but Acton has has not been noted for much in the way of "loctitutional" work.

Now the call has come. We have a number of Christian shurches here. Suppose the pastors of these churches attire. At the conclusion of the reconfer, and call together such of their past the president solemnly reads the working staff as would be likely to help to formulate some scheme, and, the groans and lamentations of his have some united; bearty, broad and erstwhile club members. at the same time thorough effort such as can be made this winter for an evidently very needy section of the community. It need not be a question of special denominational accretions. but "who is my neighbor?"

THREE FORMS OF WATER.

Elther of Which Can Ever Be Changed Into One of the Others.

There are three forms of matter, solid, liquid and gas, and water is capable of taking any of them, just as the famous genie in the "Arabian Nights" could take various forms at

We usually drink water in what is called its natural state. When we put water our object is simply to make it hot, but we still want the water to be If we forget about the kettle and

leave it on the fire too long we shall and the wat rall gone. The heat has turned it to gas, and it has floated off and mixed with the sir. But when we have a stove in the room and put a pan of water upon it we do not want the water. we want now is the ges. As it boils eway it restores to the air in the room the moisture that is dried up by the heat of the stove, so that the eir is still fit to breathe. In winter, when the skating season is on, we like to find some water that

In neither liquid nor gas, but solid. The reason that it has turned solid and not gas is that instead of heat being applied to it all the heat has been taken out of it, but we can soon get it back to water again if we take piece of ice into a warm room. Water absorbs heat very quickly, a. I that is why it is easy to buil it. We use this absorbent quality when

we sprinkle water on the floor it summer. It absorbs the heat and cools off the room. We pull down the shades to keep the heat out, her cause we know that the walls and the stone pavements make things hotter. . Remember the scientific rule, "Bolids, reflect beat; fluids ab-

water, we can always change it into either of the two other forms. When the water boils away we can hold cold plate over it and see the vapor condense again into drops. We can take the drops out into the cold wipter air and watch them freeze solld and then take the ice back into the room and thaw it and put it into the kettle again and see it rise in vapor once more.

Marriage Penalties.

Much is heard of the taxation of the sarth, still, the point of starting | deemed a punishable offence. Perhaps the most extraordinary ideas with reference to this subject may be said to be held at Oxford University in Eng. land. There, for instance, a fellow of All Souls College forfeits his fellowship if when studying the classics he should take unto himself a wife. In such event he must not only pay a penalty, but must also present his college with a memorial in the shape of a silver cup, with the further con-

dition that on this cup shall be in-There is an aristocratic club in London, the Bachelors of Piccadilly, whereof the members who so far formarry are actually expelled and ostracized. The only saving feature of such expulsion is that by the payment of a find of \$100 the offending one may retain an honorary member-

ship, but so far as active membership is concerned he is strictly out of it for the rest of his life. There is a similar organization Germany, the Jungesellen Club Whenever there comes to the offi-cials of this club any intimation that a member contemplates matrimony be is immediately summoned for trial in the cle's court, with the president as judge. The culprit is allowed to plead in extenuation of his offence, and upon his skill in presenting such ples depends the amount of his fine. which ranges from \$100 to \$1,000 The humorous feature of the fine consists in the application made. The money is devoted to a dipper, whereat all members appear in mourning

Fatal Injuries at Guelph

ONE HAD MIS JAW BROKEN

The Guelph Mercury gives particuare of an accident which belof T. Klyn, an Austrian, and D. Jacko, an Italian, both suppleyed in the Anton Tanning Company's works here, while on a vielt to Guelph on Monday. The two men had been spending the

holiday with a friend in Guelph, and n the middle of the foregoon during the rain were walking down towards Allan's Bridge, and reached shere just as the O. P. R. train from Toronto was passing through at 10.50. The him, too, a St. George to add to the procesing when the two men continued | warrior had been gathering from boyon, hitting the baggage car. They

were thrown clear of the tracks/ Klyn where Skobeleff stood, and men the ambulance and a doctor sent for. the previous morning. Jacko went to look for a doctor, but never returned, being possibly dazed with the blow he had received.

the right possion, and knocking all the teeth out. A place of wood about two inches long and an loob around was still in his jaw when picked up, frowned, turned short on his hoel and this was taken out by the men word or a gesture of greeting or refeet apart, kept his house damp and General Hospital and at last report he was not yet able to exercise from was getting along very nicely. C. P. R. Agent Brown endeavored

th locate Jacko, the chum of the infored man, but was unsuccessful, he having evidently gone back to Auton. ness of the accident. He was coming up to the city, and while crossing the track heard the engine whiatle at Taylor-Forbes, the crossing bell also ringing. He hoticed the two men walking down to the crossing, each baving an umbrella, and after passing them heard some one shout from the train, ... He turned around and looked; and saw them walk right fato the train at the baggage car. At this time both the engine bell and the crossing bell were ringing and the engineer was leaning out of the cab. The men were very furtunate in

What kind of a silo will yours be?

Acton, Ont.

Wood-or Concrete ?

IF you were to build two silos-one of wood, the other of concrete-side by side, and then could see them as they will look after five years of service, you wouldn't have to think twice to decide which is the best material. In a few years more there wouldn't be much of the original wooden silo left-the repairing you'd have to do would be as troublesome and cost as much as the building of an entirely new one. But the passage of five, ten, lifteen or even twenty years will make no difference to the hard-as-rock wall of the concrete silo.

CONCRETE SILOS LAST FOREVER WIND, 'rain, fire and lightning are alike defied by concrete. You need no insurance against its destruction, because it equand be destroyed. Concrete siles are best for another reason. The concrete keeps the ensilege at an even temperature, so that it "cures" better, and therefore contains

YOU CAN BUILD ONE YOURSELF NO matter whether you have ever used concrete or not, you can balld a concrete elle. Our beek, "What the Fermer Can Do With Concrete," gives all the information you will need, not only about siles, but about soores of other uses for concrets on the farm. It isn't a catalogue, nor an advertising circular. A handsome book of IEO pages, well liketrated, and written for farmers, it is free. Just send your name and address on a postcard or in a letter and therbook will be sent free

Autumn Style Impressions

The New Fall Suit for Women and Misses

THE styles we are showing are those that have been accepted as leaders for this season. Every style is on smart lines, and though there are any number of models for you to select from, every one is down to date. The materials employed are thoroughly dependable and fashionable. Chinchilla and diagonals being the two leading materials. These garments are made with more than usual care and attention to details. Every stylish celor is represented.

We believe this showing will at once impress you with this store's value giving an impression that will-last throughout the season.

Prices range from \$12.75, \$15.00, \$16.00, 18.00, \$25.50, \$25.00 up to \$35.00. Now, if you are curious about the new suit styles visit our Women's Ready-to-wear Department on the second floor and let your eyes tell the story. Plenty of courteous salespeople to aid you in viewing, and not one to urge you to buy. We suggest an early visit.

Millinery Orders

Miss McGuire, who now has charge of our Millinery Department, comes to us highly recommended, and will, we feel sure, give satisfaction to our many customers. Having just returned from visiting the leading fashion centres, Miss McGuire is in a position to show you some very smart ideas for stylish Fall Millinery. All orders left with this department will receive prompt and careful attention.
