THERE Is considerable talk as to who will receive the appointment to fill the vecency of the registrer of the county, caused through the death of Lelut.-Col. Kerns. The names Victor Chisbolm, Dr. Nixon, M. P. P. D. Henderson, M. P., and ex-Mayor Hillmer, Oakville, are among the names already mentioned .- Burlington Gazetta. This is about the finest position in the county and Mr. Hillmer would fill it well should be be the fortunate man .- Oakville Star.

Mr. McKrowx, of Dufferia, has a bill before the Legislature the object of which is to compel life insurance companies to scorpt the age of an Insured person as written in his contract. In some cases serious difficul ty has occurred on the death of an incured person in proving his age a the time his policy was taken out. It is to prevent this difficulty and to sosure the nettlement of the agrappeation at the time of insurance, and not when the insurance becomes due by death. that Mr. McKeown has framed his

AT THIS SEASON of the year when the annual reports of the various banks of the country show that divideads ranging from seven to ten per cont. per annum have been paid to the shareholders, the depositors are inclined to think they should be receiving more than three per cent, on their eavings deposits. The last issue of the Financial Post, bowever, gives an interesting table showing that the earnings of the aggregate assets of the Canadian banks of \$1,343,390,233 is only 1.37 per cent. There is no bank in Canada saraing as much as 2 per cent; on its total assets. An advance of even one per cent, to depositors would, therefore, wipe out the major portion of the earnings, and would place some of the banks at least in a perilous position financially.

Concrete is the best building material

BROAD statement. Yet literally true. The aim of man from the beginning has been to make his building materials as nearly like not teral stone as possible. The great labor required to quarry stone led him to seek various manufactured substitutes. The only reason he over med wood was that it was easiest to get and most convenient to use. Wood is no longer easy to get. Like most building material, its cost is in-

crossing at an starming rate. The cost of concrete is decreasing. So, from the standpoint of either service or economy. Concrete is the best building material. Canada's farmers are using more concrete, in proportion to their number than the farmers of any other country. Why? Because they are being supplied with

Canada Cement a coment of the highest possible quality, which is sures the success of their concrete work. The secret of concrete's popularity in Canada lies the fact that while we have been advertising the new of concrete, we have also been producing, by scientific methods, a cement so uniformly high in quality that the concrete made with it gives the complete concrete would not have been in such universal bee today, had an inferior grade of coment been supplied.
Insist upon getting Canada Cement. It is your best
assurance of thoroughly satisfactory results from
your concrete work. There is a Canada Coment
