**The Acton Free Press**  
 THURSDAY, JULY 24, 1913

**EDITORIAL NOTES**

THE COURT OF SESSION has appointed a liquidator for the Acton Free Press, in consequence of the failure of the Acton Free Press to pay its debts.

THE INTRODUCTION of the rural telephone system in older Ontario has done much to lessen labor and improve the pleasure of farm life during the past quarter of a century, and, as this is to be followed by a parcel post delivery, the value of the rural telephone will be largely increased to the country people. Local authorities will probably agree to free delivery when the parcel post is in operation.

**THE ANNUAL REPORT** of the Guelph Farm shows that the population for the year was three hundred, and notwithstanding the increase in population was maintained throughout with less trouble than in the city. The Parish Commission which has been in operation for two years, has done most satisfactory work. Three hundred and ninety-four cases have been considered, tickets of leave having been granted in two hundred and four cases. Of this number only four failed to make good.

SEVERAL interesting features, that show the trend of Canadian finance this year appear in the Canadian Bank statement for the past month. In the first place demand and savings deposits showed a decrease of over nine million for the month and of over nineteen million for the year. The public evidently have obligations to meet that prevent them from banking as much this year. Deposits in Canada totalled \$285,000,000, while a little over a year ago they went well over the billion mark for the month.

THAT Canada's manufacturing enterprise compares favorably with the United States is well indicated by the following figures. With a population of one-twelfth that of the United States Canada had 12,128 establishments in 1910, compared with a total of 298,401 across the line in 1909. Ours were capitalized at 13 billion dollars as against the United States 194 billion. Our wages amounted to \$107,000,000 against 34 billion over there. Our products were nearly 11 billion compared with 20 billion. Our materials were valued at \$201,500,000 against nearly 120 billion in the United States. Thus our heavy borrowings and adverse trade balance are accounted for by our commercial activity.

**LICENSED BARS MAKE UNHAPPY HOMES**

The following appeared in Saturday's Toronto Star:  
 Editor of The Star: I was pleased to see in a recent issue that John Aronke was satisfied with the Temperance Act. He still gives a side-glance to Local Option. Perhaps he is one of the strong-willed men who have nothing to fear in having a licensed house at his door or near by. If so, let him take it from me that he has much to be thankful for. Having seen both sides, I know well which gives the most home happiness, and those afflicted homes are thankful for small mercies. Hence we embrace Local Option. Many a home has been made unhappy by the reopening of Local Option in one town last January. Being and knowing, I am speaking for speaking. AN OUISSEKUI.

**A WORTHY COMPLIMENT**

It was a fine compliment to the reputation and standing of the Guelph Business College, that the Hon. Woodbridge N. Ferris, Governor of Michigan, in his capacity as president of an educational institution, should consult Principal MacDormack by letter, as to the merits of the system of bookkeeping and business practice taught by him. The system taught by Principal MacDormack was in due course adopted by President Ferris, and is now used with high appreciation in the largest, independent, educational institutional in the state of Michigan.
