—The origin of gloves is very ancient. Some authorities assert that they were known to the Greeks, from references made to "aloues" which were thought to be identical with gloves. The first clear account of gloves comes, however, from Xenophon. This writer speaks of the Persians wearing gloves on their hands to protect them from the cold. Homer describes Laertes working in his garden with gloves upon his hands to protect them from the thorns, and Virgil mentions the apparel as being worn by the Romans. Gloves have been tokens of solemn and important things from the sixth century. They were adopted as a sign of the church, and later the transferring of hands or titles was always attended with the presentation of gloves. In the eleventh century the method of challenging to single combat by throwing down a glove was instituted, and this custom still remains in some countries.
