The present day restlessness is the present day weekness. Young people are impatient to leave home, not because they have any better place in view, but because they want comething different. They chafe under restraint, not because the prohibitions are severe or unkind, but because they like to feel themselves absolutely unfettered. They let go the old beliefs, not because they have been convinced that they are mistaken, but because of a certain mental inertia which makes it difficult to grip anything, even

faith, with a resolute, unyielding Restless young people are likely to scoops their rectionmens as a proof of superiority. They have a certain contempt for the boy on the next farm who stays at home, for somebody elec who sticks to the faith his mother tanget him, instead of being curried away by some fantastic modern theory for those who are restrained by the conventions which have protected society for hundreds of years. But restlessmess does not prove greater window, not more ardent love of truth. The world's debt is not to the restless, tossing like the waves of the see, but to the stable, steadfast as the ever-

esting bills.
