WHAT TOMPODLERY

"At the meetings of the United King does Alliance in Manthoster, England, leading doctors all over the world, including Chinese Physicians, of the highest rank and regulation in their profession were present. They all spoke of alcohol as a dreadful protoplasmic poison which lowone the vitality and replace the system more liable to disease, especially consumt tion. This most terrible of all discusse the most deadly discuss in the world. great Paris doctor found that there was no quantion that the man who took alcohol however small quantities introduced into his blood that which tremendously lowered the nower of the white cells to overcome the microbs. That has been proved direct ly and indirectly by statistics of persons who have visited Paris in order to be

treated of various illegance." "Bir Arnold White has discovered that the germs of consumption are found in prested numbers in the bedroom of viotim of tuberoulosis, and that the second prolific site of this deadly enemy of mankind is the public barroom. Medical Officers of Health, including our own distinguished Dr. Nivan, are in pariect second with that opinion."

Home time agothe International Congress on Tuberculosis nest in Paris, and was attended by the world's greatest experts in that disease. That Congress passed ununimously a resolution which they forwarded to the government of every country, to the effect that the fight against tuberculosis must everywhere be combined with the

fight against alcohol. The doctors who passed that resolution were not temperance crunks but men who devoted their lives to the study of tuberculosis, and they said, "If you are going to fight this you must simultaneously fight

alsohol." In view of these facts what tomfoolery it is to talk about stamping out consumption without attacking the cause. And what folly it is to maintain places that cause consumption and at the same
