## BE AFRAID OF A COUGH OR COLD.

Coughs and colds do not call for a minute recital of symptoms as they are well known to everyone, but their dangers are not so well known. All the most serious affections of the throat, the lungs and the bronchial tubes are, in the beginning, but coughs and colds.

Many people when they contract a slight cold do not pay any attention to it, thinking perhaps that it will pass away in a day or two. The upshot is that before they know it, it has settled on their lungs.

Too much stress cannot be laid on the fact that on the first sign of a cough or cold it must be gotten rid of immediately, as failure to do this may cause years of suffering from serious lung trouble.
