WHEN FORTUNE CALLS

The Japanese have a saying that "for tune calls at the gate of him who smiles and that alrowd saying is worth the con -alderation of all young people. A graduate from a school of pharmacy had suffel ent funds to buy a business in an excellent location in a large and prosperous city. The young man had made a brilliant record in solved. His store was attractive and well equipped and already had a good patronage.

He had not been established thre months when traile began to fall off. Some customers went to a store a few blocks of Others had their prescriptions filled down-town establishments. The proprietor began to worry and it was not his fanoy that the more he worried the more his trade deminished. At length he appealed and saked him what the trouble was And he was very much estonished when the answer came, "You need to learn to

That was the trouble. The samest, hard-working young man had a frowning face and forbidding manner. The customers were likely to take offense at his brusque speech, or to be alienated by his gloomy countenance, and many of them began to look for a place where they could be served with a smile thrown in for good messure. And when acting upon his friend's counsel he bugan to cultivate a friendly, helpful manner, he found it helped wonderfully.

"Fortune will call at the gate of who smiles." Then why not smile?
