#### SHE FOUND OUT HOW MUCH HE MADE

A recruiting sergoant tells this story of the wife's allowance from the employer. In this case, no sooner had the Reserviat husband left for the front than the wife received a generous invitation to call at the employer's office each week for half-wages. The cashier found no reason to complain of any want of promptitude in her response. He handed her a sum which caused her to ask him in surprise if he had not given her too much. He assured her that she had been paid exactly half-wages. "How long has my husband been receiving these wagon?" also inquired. "For about five years," was the reply. "Then," rejoined the indignant wife, "he has more to fear from me than from the Germans.

#### Enhanced By Perfect Physical Health.

The experience of Motherhoodies tryno one to most women and marks distinctly an epoch in their lives. Not one woman in a hundred is prepared or understands how to properly care for herself. Of course nearly every woman nowadays has medical treatment at such times, but many approach the experience with an organism unfitted for the trial of strongth, and when it is over her system has received a shock from which it is hard to recover. Following right upon this comes the nervous strain of caring for the child, and a distinct change in the mother results.

There is nothing more charming than a happy and healthy mother of children, and indeed child-birth under the right conditions need be no hazard to health or beauty. The unexplainable thing is that, with all the evidence of shattered nerves and broken health resulting from an unprepared condition, and with ample time in which to prepare, women

will peralet in going blindly to the trial. Every woman at this time abould rely upon Lydia E. Finkham's Vegetable Compound, a most valuable tonic and invigorator of the female organism.

#### BUILDING WITHOUT WAX

Years ugo, the rich man of Rome were building coatly marble manaions along the Tiber. These buildings were magnificent, many of them of almost priceless value. The wealthy Romans vied with one another in their construction. The best of marble was used, but sometimes, even in the best of marble, there would be tiny niches, or cracks-small in themselves, yet they detracted from the magnificence of the manalogs whose owners wanted nothing less than perfection. When the contractors, who undertook the building of these edifices, came across blocks of marble with tiny bits knocked out, what were they to

do? Throw out the block? But that would cut down their profits. They had a kind of wax very fine, and they used this to fill in the broken places detection. Then the blocks of marble Doan's Kidney Pills are 80c. per box, could be used. True, the wax would wear apparent "But it will not be for years." the contractors said.
