COULD NOT STAND THE LEAST EXCITEMENT

When one gets weak and run down the heart becomes affected, the nerves become unstrung and the least excitement causes a feeling of utter lastitude. What is needed is to build up the beart and strengthen the sloky nerves by the use of such a medicine as Milburn's Heart and Nerve Pills.

Mrs. J. A. Williams, Tillsonburg, writes: "I cannot speak too highly of Milburn's Heart and Nerve Fills. I suffered greatly with my nerves, and was so weak and run down I could not stand the least excitement of any kind. "I hardly think you will care to locate in that section of the city," said a young woman to a friend who was about to make his home to an eastern city. "They are nice enough people," she continued putroulzingly, "but rather-well, ordinaryyou know-they are the wort of folks who out their own grass."

It must not be supposed that the speaker was a representative of the local "four hundred," one of the aristocratic few whose loast move is chronicial in the Hociety Column. On the contrary, she was the daughter of a man on a small salary acoustomed to plain living, and rigid economy. But she had acquired false standards. To her mind the man who used his own lawn mower on the tiny grass plot possible in a crowded city, Hid so at a sacrifice of lile social standing. Home one has remarked that the modern

dread of carrying a package home from the shops has not a little to do with the bigh cost of living. It is not so many years ago that this tendency was considered laughable. The fathers and mothers of some of you young people will remember a humorous cartoon appearing before the day of crinoline went out. The shopper, a much rufited hely with a tremendous hoop, bought a paper of pine, and ordered it sent. The proprietor gave the order. "James, take the truck." And the artist chose to represent that scene, the stately shopper a little in advance, while behind sonally, "he says that he rarely goes to bed her a grinning porter follows with his before I, but it seems to him that it is a truck, on which is displayed the paper of pine. That was considered a joke in the sixtles of the last century, but in the twentieth century it has become sober reality. Every day every, large store in the country delivers hundreds, if not

> The most serious skie of this question, however, is not the inevitable increase in the coat of living. It is the revelation of the tendency to look down upon manual labor. GOOD MANNERS.

Little Acts That Break Aloud About a

Person's Breeding. It is always the morest trifles rather than the bly things of life which indicate the manners and tastes of the average person, says a writer in the London Chronicle. A glaring social error, a particularly rude action or tactions speech are not made with too great frequency, but other less obtrusive faults are often committed-somelmos solely through fguorance or

want of thought. It is just no grave a mistake to be too polite us to be abominably rade. The painstakingly polite person is very trying to encounter, for extremes often meet, and he generally succeeds in be ing actually ill bred. For instance there to always the man who, in the mistaken idea that a woman should niwnya precede him, nilowa her to fight her way into a crowded train, descend unnided and walk before him into a restaurant that is rather full.

Removing his right glove before shaking hands with a woman; raising ble hat when he offers a damsel ble went in a car; carefully piloting his fall companion across a crowded street; walking on the outside of the pavement and refraining from sitting when talking to a woman who happens to be standing, are all instances of those little things which mark the good breeding and thoughtfulness of a man. Unfortunately in some cases these things do not come by instinct, but rather through the hard school of experionce.

On the other hand, a woman requires to be just un careful of her manuers. It is very exciting no doubt to talk loudly and initiate casual hearers into the mysteries of an intimate conversation with another woman. Unfortuthousands of articles as insignificant as the nately the listeners are only contemptuously improssed with the fact that the speaker is incapable of controlling

her own voice. It is usually either nervousness or thoughtlessness that prompts a woman to display her worst side to the world. She will take a seat that is offered to har in a crowded car without a word of thanks or else will make the chivalrous person feel still more embarrass ed by a quick and emphatic refusal to profit by his generoeity, or perhaps she will rush through swing doors without bothering to notice if any one is likely to be caught in the rebound. elbow people who are in her way. walk on the wrong side of the street or fail to remember that she must always bow first to her men acquaintances before they raise their hats.

We bent "Wixard" Schnefer and Eugeno Carter by three feet and nine inches.

Bob Fitzsimmons, who was credited with striking a blow that was compared to the kick of a mule, could barely touch nine cushions, while Jim Corbett made about eight, yet Ives weighed only about 145 pounds at the time.-New York Journal.

Love, Life and Eugenice. Suppose the eugenists could have their way and banish love, who would care to live? What nurpose would life have? It would have none. There would be no life, only an existence, wearlsome and dull. The world feels that love to beautiful, it sees in practice that it is true.
