Meredith. the 48th Highlanders, who addressed th recruiting meeting in the town hall in the ovening, and Pro. Habil, of the first continment from Acton who is in a convalorcent hospital in Toronto. Rec. Mr. Avison proached a stirring sermon and the service throughout was full of interest.

Assets of Over \$100,000,000 The steady growth of The Bank of Nova

Scotia is evidenced by the incresse in assets from \$03,733,670 to \$101,244,467 during the year, while not profits for the year onding December 31st, 1015, were 81,220,057 as compared with \$1,190,116 for the provious year. Cash slone exclusive of the deposite in the Central Gold Reserves amounted to 20% of the liabilities to the public, while immediately available assets have reached a total of \$50,000,461-an exceedingly strong position. This fine standing is a matter of much satisfaction to the shareholders and to the depositors, Mr. A. L. Wyant, the manager of the local brauch, is pardonally proud of the

splendid position of the financial institution he represents in Acton. Life and Work of John Huss

of Boston Church, Esquesing, in Knox Holicol Room on Tuesday evening, was there. We will have New Years in our social good time, with a hilarity hardly belistened to with intense interest by a large billets. gathering of the young people of the church. The life and work of John Huss, a noted reformer of the fourteenth century, was epitomized in graphic and interesting word pictures. Huse propagated the the aid of a tin of dubbin and some candle doctrines of Wyellfe and preached with veliemence in fields and houses against the As I was going to put on the coffee the tin ovile of his day, until, unshaken by on- tipped over and put the fire out. Then I oppressed people, and later in his own treaties or by terrors, he was arrested, had to start all over again, and when I got person the cost of trying to redress those stance, on July 7th, 1415. It is a very common mistake to beflove that good materials, whether of cotton, allk or wool, need less care than chean ones. How often does one complain of the lack of wearing quality ir a garment for which a big price has feen paid. Yet, most frequently, what

netual use, but the neglect it has suftween good and cheap uniterials is that the latter grades are finer spun. This mity mean that the fabric to stronger and, in proportion to the uses to which It is put, may wear longer, but it also means that each they thread by itself is weater and more apt to lajury. Any thing which may attack the threads mo by one, therefore, does more harm.

with tine goods than with coarse. No matter how careful one may try to be, clothes that one wears gradually got'u trifle of the grease from the per uptration of the body. In unite of constant watching clothes will become dusty. This combination of dust and body moisture forms a regular, breeding ground for they little vegetable growths. These are so small that It takes the

little barm, but many of them set free an neld which eats into the fiber of the unterlat. If the individual fiber to coarse the deposit of the neld upon it is not enough to eat all the way through, but if it is sheer or woven of tine threads one by one the threads are caten through and the texture weak-

Good clothing, instead of being kept shot away in boxes and drawers, should be constantly aired and staken. The goods will wear out by using, a fine piece by being laid away
