SHREWD BEGGAR

A map, while walking with two ladies through one of the principal streets of London, saw a man begging. One of the ladies, who had evidently seen the mendicant before, said :

"This is the most singular man I ever heard of. No matter how much money you give him he always returns the change and never keeps more than a ponny." "Why, what a fool he must be!" to marked the man. "But I'll try him and

put him ton little trouble." So eaying, the man pulled from his packet a savereign, which he dropped into the baggers bat. The menticant turned the colo over two or three times, examin ed it closely, and then, raising his eyes to the countenance of the benevolent man,

"Well, I'll not adhere to my usual custow in this case. I'll keep it all for luck,

but don't do it again." The donor opened his eyes in astonishment and presed on, while the laties smiled

Children Ory If your neighbour is oconomical she is stingy and if generous extravegent, so CASTORIA what is a poor creature to do?

GILLETT'S LYE EATS DIRT HOW TO KEEP WEL

BY JOHN W. H. McOULYAUGH: M.D., D.P.H., OHIEF OFFICER OF THE PROVINCIAL BOARD OF HEALTH.

EFORM GOING to a place for your summer vacation it is well to be sure that the water-supply is not likely to give you or the members of your family typical fever. Get a sterilized bottle from the Provincial Board of Health Laboratory at No. 5 Queen's Park.

and have the water examined. If you have a cottage of your own, take particular care that the contents of your water-closet is screened against the entrance of flies which may carry disease to your family or the families of your neighbors. Besides, if you take these precautions, you will have a right to demand that your neighbors take like precautions. If you use a closet, be particularly careful that its contents do not get to any source of water supply.

If there is a good supply of sand near your cottage REHORT It is a cheap and simple matter to instal a system of subsurface sewage disposal. The Provincial Board of Health will supply you with a pamphlet telling all about how to catablish a plant of this kind. If there is no sand or gravel the safest system to use is a closet with buckets, using dry earth or ashes to cover the exercts each time of using. Have close-fitting lids to the closet below and a screen door to keep out the flies.

It is a good plan to get your doctor to incculate you against typhoid and paratyphoid fevers. If you are not satisfied that the drinking water is pure, either get a safe supply or boll all water used about your place.

Some of the doctors are complaining because the Registrar General to prosecuting them for not reporting births. Well, they cannot complain that they have not had warning. For years doctors and parents have been repeatedly warned that they must obey the law regarding notification and registration of births. Some few of the doctors say they should be paid for this service. In the opt 'on of the writer they should NOT be paid for doing what is a plain duty, and for obeying the law. Any physician who does not think enough of his patient to register the birth of her baby does not deserve to have the buly's mother for a patient any longer. The Government demands that physicians shall forthwith notify the Division Reglatrar of the birth of a baby at which they attend. The Division Registrar will provide post-card forms for this purpose. These are carried post free. The neglect of the dector does not relieve the parent or householder where on as well and as happily as circum- the birth occurs. They too are supplied with post-free cards for this pur-

> information. If it is not supplied to him promptly he should notify the Registrar General, giving the names and dates. The Department will do the rest. These are the three most common means by which diseases are spread from one person to another. How can these means of contagion be prevented? Fingers must be kept out of the sources of disease. Children must learn not to put their fingers into their noses or mouths: FINGERS, If the hands, as they invariably do, become dirty they must be washed before each meal. Dirty fingers may carry infection to toys, penells, etc., often used in common by children, and to cups, spoons, and other table utensits which may be used by other members of the family. In the large concentration camps one of the Important measures taken to prevent the spread of disease among the men is to have all the food utensils, such as cups, plates, knives, forks, etc.,

promptly made to him to ket after both parents and dectors and obtain the

Food and water carry many diseases, the former because it is often exposed to dirty fingers and to files; the latter because sawage containing the discharges of human bodies is allowed to get to the source of supply, be it spring, river, well, or lake. Buch a food as milk may be handled by people who are nursing typhold, diphtheria, or tearlet fover patients and thus be the path whereby these disore transmitted to others. Or the milk may be the product of cows "I with tuberculosis. This is the cause of the greatest proportion of . : n children in whom it often lies dormant until the age of 15

THE HORSESHOE LECKED

Here is an explanation of the old horseshoe superatition : Ht. Dunatan wasa skillsel farrier. One day while at work to his forgo the devil cutered in disguise and re justed Dunstan to shoe his "single hoof. The saint, although he recognized his malign oustomer, accorded, but caused him so much pain during the operation that Batan hogged bim to detect. This 8 Dunstan did, but only after he had made the evil one promise that neither he nor any of the leaver evil spirits, his servants, would ever molest the inmetes of a house where the horseshoe was displayed.

Miller's Worm Powders attack worms ! the stom ich and intestines at once, and ne wormen come in contact with them and live. They also correct the unhealthy conditions in the digestive organs that invite and ensourage worms, astting up re actions that are most beneficial to the growth of the child. They have attented their power in hundrede of cases and at all times are thoroughly trustworthy.

DIARRHOEA Was Caused By Change of Diet, Etc.

Diarrhoes arises from many causes such as, change of diet, change of water, change of climate, catching cold, the eating of unrips fruits, or anything that will cause or induce an excess of bile. On the first sign of any looseness of the

bowels it should not be neglected, but should be looked after immediately, for If not diarrhoes, dysentery or some other serious bowel complaint may ensue. Mr. Geo. Smith, Victoria, D.C., writes:

"It is five years ugo since I first tried Dr. Powler's Extract of Wild Strawberry. Dr. Powler's Extract of Wild Strawberry. I was then on a timber survey, and suffered greatly from diarrhoea, caused by change of diet, etc. A friend in the party gave me a few doses which gave me great relief. Since then I have been in survey work, and would as soon think of starting out on a trip without my compass and blankets as without my supply of Dr. Powler's Extract of Wild Strawberry, which I consider the woodsman's best friend."

Dr. I'owler's Extract of Wild Strawberry has been on the market for the past seventy years, and is universally known as a positive cure for all complaints arising from any looseness of the bowels.

When you ask for "Dr. Fowler's" be mre you receive what you ask for as there are many rank imitations of this sterling remedy placed on the market to try and fool the unsuspecting public. The genulae is manufactured by The . Milburn, Co., Limited, Toronto.

United States rallways by way of Souttle. The hallbut were caught in Alaskan waters and were purchased from the hallbut flahermon by aupply boats sent north from Scattle. Since the establishment of Prince Riupert as the Pacific terminus of the O. T. P., fully a third of the catch has been taken by the fishermen to Prince Rupert, sold directly by thom, and shipped in bond over the G.T.P. A Canadian order-in-Council was published in March, of last year, allowing version of United States rogister to land fish free at Prince Rupert for trans-shipmont to United fitatou markets. The rail route is just as short and just as chony and the ocean carriago is nearly six hundred miles morter. The new arrangement in raid to have benefited the fishermen and to have provided the consumers in the enstern States with fresher and cheaper fish. It has not pleased the United Blates transportation Interests nor the Scattle companies which formerly controlled the trade.

For a year these interests have sen seeking to have the old system o bring this restoration about. Th

up to have the law on them." The determined efforts of the interests formerly controlling the trade appear, however, to have borne fruit. and the bill now before Congress in the name of Rep. McGillicuddy, of Maine, provides that "no fresh or frozen halibut or salmon from the North Pacific Ocean or tributory wators shall be admitted into the United States from any foreign

Three Hundred Fox Companies. The solld and stable chaarcter of be silver black fox breeding industry in Canada is attosted by the mannor in which Canada's fox companies have during the past two years stood the stress and strain of war conditions, closed markets and diminished values. Not one of the three hundred companies engaged in fox breeding has sought relief in liquidation. On the contrary, they are carrying on their business at the old stand and increasing their production from year to year. While temporarily auspending the payment of dividends, they have increased the numbers of their breeding stock and added largely to their productive

The pioneer silver fox breeders "builded better than they know." They created a new industry necessary to commerce and capable of a vast expansion. It is especially adapted for extension in every one of the nine provinces of Canada and the ton or twelve border states of the groat American Republic. Any farm throughout those vast agricultural regions might profitably add a fur ranch to its equipment. Fur farming as an adjunct to agriculture adds a profitable factor to the ordinary farm, without displacing or disturbing any of the ordinary activities. the alte and supplies the lumber for ranch construction. No farmer who adds a fur ranch to his establishment need keep fewer horses, cattle, sheep, swine, or poultry on that account. A small ranch will hardly require any addition to the number
