EPIDEMIC CERCEPTOSPINAL MENINGITIS. Will is an old disease which has been brought into undattal prominence by the fact that some of the soldiers in concentration camps have suffered from it. But it has been the experience in Toronto at least, that more of the civil population have suffered from the discuse than have soldiers. It is a communicable (that is "catching") disease: It is also known as a "carrier" disease; that is, some persons who do not suffer from the disease carry its gertis in their noses and throats and give it to well people. Corebro-spinal moningitis is also due to the germs of pneumonia and tuberculosis.

These forms are practically always fatal. The form CEREMINO-SPINAL commonly found is due to a gern with the highsounding name of meningo-coccus. It is most succonstully treated with a serum which is injected into the spinnt canal after removal of some of the spinal field. The disease appears to be quite centagious, probably through the medium of the nose and throat discharges. As already remarked, it is not a new disease. It occurred during the

and at vacious times in epidemic form in Europe and the United States. It in not a war discuse, but is more noticeable in war times because large numbers of non are congregated together. The serum for its treatment regulres to be most carefully prepared. It is supplied free to the people of this Province on application to the Pro-

Nanoteonic wars, in the Crimonn war, and in the United States Civil war,

vincial Board of Health. There is a popular idea that done become mad in the bot days of summer, the dog-days. This bollef has no foundation; in fact, Hydrophobia or Rabica, the proper name for this affection of dogs, may occur at any time of the year, and as a matter of fact the fewest cases are found in Ontario in the number time.

A don affected with rables suffers a most complete alteration of his babits. If he has been friendly and playful he becomes quiet and morose and will snap at his bent friends. He leaves home and runs the country, gets into fights with other dogs and often infects them. MAD DOGS dog manifesting a change of disposition should at once be chained up or kept in a safe enclosure under observation. Il he has rables he will die within ten days. He should not killer, at once, because the evidence of his affection may be destroyed. Wher, he dies his head should be parked in ice and sawdust and expressed to the Laboratory of the Provincial Board of Health, No. 5 Quoen's Park Toronto, where on examination will be made free of charge and report made to the rader. If a dog which is proven to be rabid has bitten anyone, the person black should be sent for treatment to No. 5 Queen's Park, Toronto, where preventive l'autour treatment is given free of charge. The treatment requires a period of three weeks, and does not interfere with the person going about and enjoying the sights of this great city. In the last six years hundreds of cases of persons bitten by dogs have received this treatment the best results in every instance.

The safest and quickest cure for diarrhosa, dysentery, colic, cholera, cholera, morbus, cholera infuntum, pains in the stomach and all looseness of the howels is Dr. Fowler's Extract of Wild Stray

Mr. Ernest Jeffery, Moose Jaw, Sask. writes: "A few years ago, when I first came out to Canada. I went to the harvest field to work. Somehow or other the water did not agree with me. I had the darrhoes so had that blood was coming from me, and I thought my last days had come. One of the harvest hands advised me to take Dr. Fowler's Extract of Wild Strawberry, and before I had used the bottle I was able to go to work again. My advice to all is always keep a bottle of this wonderful diarrhoes cure on hand."

"De. Fowler's" has been on the market during that time, and we have yet to hear of a case of bowel complaint where it has not given perfect satisfaction.
