EDITORIAL NOTES

Notices have been sent out to all county judges asking them to have as few jury cases as possible this summer. This is being done to relieve the farmers, who are generally in the majority in the lists of those called to serve on the juries, so that the work of production will not be interrupted.

The German Minister of Finance announces that he is opposed to further increases in the income tax of his government since the war indemnity which Germany will demand from Great Britain and the United States "will cover the deficit." This German minister is evidently as presumptuous as his war lord master, the Kaiser.

A patriotic duty devolves on every one to register. It is not an optional matter, but a duty. And after the end of the month, everyone of Canada sixteen years of age and over, male and female, will be expected to produce evidence of having complied with the law. The certificate issued upon registration must always be carried by the person registered.

There is a grain of comfort to mothers of nineteen-year-old men in the most recent order from military headquarters which delays the calling of this class. When the proclamation requiring these men to register was published, it was intimated that they would not be required actually to report for duty before July. It is now considered improbable that many, if any, of the men will be summoned before September or October and possibly later.

The practical, patriotic and loyal president of Halton District Women's Institute, Mrs. Gorman, of Trafalgar, was very emphatic but kindly in her criticism of the ladies who brought iced cakes to the picnic at Milton last Thursday. Mrs. Gorman emphasized the fact that what is owing to war conditions, illegal for bakers and dealers in provisions to sell, should not be made in the home. Because of the scarcity of sugar, the government has banned the sale of iced cakes and other culinary productions. We should be logically consistent in all our home preparations of food. It appears to be a veritable fact that most people in Canada have not yet begun to realize that our country is at war and food problems are serious.

Saturday, 22nd June, is the date that has been fixed by the Government for the registration of all persons, male and female, of sixteen years and over resident in Canada. It is a day upon which every Canadian will be afforded an opportunity of re-dedicating himself to the greatest cause which ever engaged the attention of mankind. It is a day upon which a free people, strengthened by sacrifice, will reiterate their unshakable determination to endure to the end. And so Saturday, 22nd June, is to be a day of privilege as well as a day of duty, a day that will go down in history as one of the milestones in Canada's participation in the war. The Canadian people are a unit in their determination to exert their full strength in the colossal struggle now being waged for the integrity of free institutions. But they will not be in a position to exert their full strength until they know its precise measure in terms of man power. Registration Day will supply this information and so enable the country to work up to its maximum effort.

The farmers of Canada will very shortly have to undertake the harvest work with the help of green labor. In this connection they should remember that we are at war, and adjust their work throughout the farm to suit the new conditions. The first adjustment necessary is to change the point of view from one of criticism and fault-finding with labor conditions, to that of the soldier and war worker, and realize that we are going through a crisis, the most serious the world has ever witnessed without any exaggeration whatsoever. There used to be talk among farmers derogatory to the town man and other inexperienced laborers who sometimes sought employment temporarily, on the farm. Such talk is out of place now, with the Germans nine miles from Paris and every available man in Britain and France fighting to save not only his own country but this country as well. Such Canadian farmers forget that they themselves have been farmers all their life. And the war time they can't expect to secure more volunteering from the towns and cities with an experience in farm work equal to their own. That is an impossibility. But it is not impossible that farm production of this country be increased, despite the shortage of experienced labor."
