THURSDAY JULY 16, 1915

OUR MOTHERS

Of mothers of the race, ye blessed ones
Who weave with cherubim the robes before.
The robes of God, the mystic door
Of life, proud mothers of beloved sons,
To-day you send them forth to front.
Waving your boys farewell with smiles
That pierce the young souls. Your
prayers implore
Before them with wild, shielding arms
outspread.
Of the vest, however varied
The skirt, striped, exceeding great
is love for you—O you, most sacred
Martyr.
To whom a given grieve royal purple
Make beautiful the temple of the Lord
—Katherine Lee Bates.

WHAT THE HORSE WOULD SAY IN JULY

If a horse could talk he would have
many things to say when summer comes.

He would tell his driver that he feels
the heat on a very warm day quite as
much as if he could read the thermometer.

He would say, "Give me a little water
many times a day, when the heat is
intense, but not much at a time, if
you want me to keep well."

He would say, "Please water me too soon after I
have eaten."

He would say, "When the sun is hot
and I am working let me have once
in a while a drink of some water or
tree; if you have to leave me on
the street leave me in the shade if
possible. Anything upon my head, be-
tween my ears, to keep off the sun is
bad for me if it cannot circulate
freely underneath it."

He would tell of the luxury of a
fly net when at work and of a
mosquito net when in his stable
and of the boon to him of insects
that bite and sting.

He would sing for cool and com-
fortable saddle, as far as possible, in which
to rest at night after a day's work
under the hot sun.

He would suggest that living all
through the warm months in narrow
stall-nether properly cleaned and
bedded is suffering for him and poor econ-
omy for the owner.

He would say, "I think that turning the horse
or the team is a good idea, too, right in time
to do unless you are looking for a sick
horse. Spraying the legs and feet when
he is not too warm on a hot day, he
would say."

He would say, "Please sponge out
my eyes and nose and dock when I
come in tired and dusty at night, and also sponge me with clean cool water
under the collar and saddle of the harness."

NODLE SAYINGS

The world is upheld by the veracity of
good men; they make the earth
whole—Emerson.

Love is its own great loveliness always,
And takes new lustre from the touch of
time;

It comes no December and no
May,

But bears its blossoms into Winter's clime.—Thomas Hood

Great minds, like heaven, are pleased
in doing good—Hawke.

There is no study that is not capable
of delighting us after a little applica-
tion to it—Popé.

The only freedom which deserves the
name of ours is that of pursuing our own
good in our way, and not attempting to
impose our wills or ideas upon others or
impede their efforts to obtain it—John
Stuart Mill.

It Rubs Pain Away—There is no
soil so efficacious in overcoming
pains as Dr. Thomas' Electric Oil. The
man that runs the oil is the man that
is away and on this account there is no
preparation that stands so high in
public esteem. There is no surer pain-
killer procurable, as thousands can att-
est who have used it successfully in
treating many ailments.

IT'S THE FARMER'S COMFORT

It will be a matter of surprise to
many to learn that the farming com-
munity owns more automobiles than any
other class in Canada, and it may be
a realization of the growing numbers
that is impelling the agriculturists to a
more liberal attitude with reference to
the improvement of roads in the country.

The occupations of the owners of
cars in Ontario is given thus, accord-
ing to figures of registration:

Professional	22,403
Skilled trades	10,327
MERCHANTS, manufacturers, etc.	14,852
Physicians	2,602
Other professions	3,394
Congressional travellers	1,463
Taxicabs	1,463
Miscellaneous	20,850

78,861
Licensed drivers
Increase over 1914 registration—15,850

Protect the children from the rav-
age of worms by using Mother Graves'—
Worm Exterminator. It is a standard
remedy, and years of use have enhanced
its reputation.

READY TO OBLIGE

Among the letters from France that
have been printed in the Atlantic
Monthly there is to be found this en-
tirely characteristic:

The case of the German officer is
never to surrender; but of course they
cannot always live up to it. In a re-
cent raid a sergeant I made a
prisoner. The German captain, who
they walked in the room, was surprised
luck in fluent French, saying that he
was caught unawares; that an officer
never surrendered, but fought to the
end.

"Stop here, my captain, and let us
consider this," said the sergeant ar-
guably. "There are several articles of
your 'code' to which my fancy
turns. That water, for instance, those
leather putters, and that fat purse I
saw you change to your hit pocket. Per-
haps I can obligue you and gratify
my taste. You were evidently
run—a quiet shot, what a
honor, and for me the trouble of
cutting you to the rear. And I am an
excellent shot, I assure you."

But the German was not interested.

Children Cry FOR FLETCHER'S CASTORIA

PLEASANT LAPSE

"How is Charley getting on in the
sky? Very nicely. He hopes to be a star
next year." "What a comet!"
"It would be nice to have him
come back in about twenty-five years."

AGDETOOS WOOD

Adeotoos is a wood which is of a
resinous nature. It is an excellent elec-
trical insulator, and is not affected
chemically by most of the active
chemical agents likely to attack
it.

In answering adeotoos, the thick
wood containing the bone fibers are
broken out with hammers, and the
flesh is then washed with water.

The waste from these operations and
the remaining short-fibred rock are
used in the manufacture of adetoo.

The adetoo has the appearance
of marl, and when dry, and lighter.

It is about fifty per cent.
heavier than oak, and its strength in
resistance to heat is greater.

The adetoo is used in the
manufacture of adetoo.

The adetoo has the appearance
of marl, and when dry, and lighter.

It is about fifty per cent.
heavier than oak, and its strength in
resistance to heat is greater.

The adetoo has the appearance
of marl, and when dry, and lighter.

It is about fifty per cent.
heavier than oak, and its strength in
resistance to heat is greater.

The adetoo has the appearance
of marl, and when dry, and lighter.

It is about fifty per cent.
heavier than oak, and its strength in
resistance to heat is greater.

The adetoo has the appearance
of marl, and when dry, and lighter.

It is about fifty per cent.
heavier than oak, and its strength in
resistance to heat is greater.

The adetoo has the appearance
of marl, and when dry, and lighter.

It is about fifty per cent.
heavier than oak, and its strength in
resistance to heat is greater.

The adetoo has the appearance
of marl, and when dry, and lighter.

It is about fifty per cent.
heavier than oak, and its strength in
resistance to heat is greater.

The adetoo has the appearance
of marl, and when dry, and lighter.

It is about fifty per cent.
heavier than oak, and its strength in
resistance to heat is greater.

The adetoo has the appearance
of marl, and when dry, and lighter.

It is about fifty per cent.
heavier than oak, and its strength in
resistance to heat is greater.

The adetoo has the appearance
of marl, and when dry, and lighter.

It is about fifty per cent.
heavier than oak, and its strength in
resistance to heat is greater.

The adetoo has the appearance
of marl, and when dry, and lighter.

It is about fifty per cent.
heavier than oak, and its strength in
resistance to heat is greater.

The adetoo has the appearance
of marl, and when dry, and lighter.

It is about fifty per cent.
heavier than oak, and its strength in
resistance to heat is greater.

The adetoo has the appearance
of marl, and when dry, and lighter.

It is about fifty per cent.
heavier than oak, and its strength in
resistance to heat is greater.

The adetoo has the appearance
of marl, and when dry, and lighter.

It is about fifty per cent.
heavier than oak, and its strength in
resistance to heat is greater.

The adetoo has the appearance
of marl, and when dry, and lighter.

It is about fifty per cent.
heavier than oak, and its strength in
resistance to heat is greater.

The adetoo has the appearance
of marl, and when dry, and lighter.

It is about fifty per cent.
heavier than oak, and its strength in
resistance to heat is greater.

The adetoo has the appearance
of marl, and when dry, and lighter.

It is about fifty per cent.
heavier than oak, and its strength in
resistance to heat is greater.
