8UGGESTION FOR MERCHANTE AND CUSTOMERS

It has been announced by the John Wanamaker department store in New York City that hereafter the store will be open only from ten o'clock in the morning until half past four in the afternoon. The purpose of this arrangement we are told, is to save coal and to avoid congestion of travel on the transportation lines. In addition to that, it is assumed that shoppers can all do their shopping within the hours named, that if all stores would observe this rule much time that is wanted by shoppers and clerks might be utilized for useful purposes, and that both the shoppers and clerks would be saved from much nervous strain and worry. And it is not reasonable to suppose that if less time was given to shopping leas needless buying would be the regult! Bull another suggestion comes to us. We heard a mother say that she thought every mother ought to be at home to greet her children when they return from school in the afternoon. We think that mother was right. The above rule ought to contribute toward that end.

"UNCLE SAM"

In spite of their protests, the American soldiers have become known to us as "Sammies," a name derived from 'Uncle Bam," who stands to the Amcrican in the same relation as "John Bull" does to us, says an English Wookly.

Why "Unch Bam?" During the war of 1812-14, Elbert Anderson, Jr., one of the contractors supplying the army of the north with provisions, advertised for proposals for pork and beef to be delivered to him during the first four months of

Among those who contracted to furnish him with beef packed in barrels were Ebenezer and Samue: Wilson, the latter familiarly called "Unclo Sam" by certain of the soldiers, who spoke of his beef as "Uncle Sam's beef." Other soldiers, not knowing who "Uncle Bam" was, thought that the term applied to the letters "U. B." stamped on the barrels by the Government officials, and so it was not long before the United States became familiarly known as "Uncle Sam," and

the name stuck.

GOING THROUGH WITH IT There are a great many different opinions expressed about the war, but on one thing we are all agreed. We are in it to stick. We are going through with it. Whatever hardships are entailed, whatever sacrifices are demanded, we are going straight on till the thing is finished. Anything else is unthinkable.

That is the spirit with which we should undertake everything worth while. Some young people start college and give up because different calculus proves hard. Some girls get a business position and resign at the end of the week because their employer finds fault with their spelling. No one can make a success of life who starts out by running away from whatever is hard. The spirit of the conqueror is the spirit of America concorning the war, that we are in it to see it through.
