YOUNG STREET - ACTON, ONT.

DOUBLE TREAD DOUBLE STRENGTH

TIRE SYSTEM Will give-and has given-entire natisfaction. By this system of doubling up your half-worn or rim-cut tires we give you a sand, water and friction proof tire, yes and 30 per cent. puncture proof. . Our tires have now stood the test of five years over some of the worst roads in Ontario.

Remember we do not new tham.

There are no stitches to rip; we do not bult them and leave open spaces for mand and water to onter. Sand and water between the two casings causes friction. Friction is the great onemy not only of the tubes, but it deations the fabric which is the atrength and foundation of every tire Our tires are as cool in the liottest day in summer as any tire you gver had on your car. By our system we thoroughly vulcanize the two casings together and in no case do we double them until all breaks in the fabric and pubber have been repaired. Next we hand rivet our putent sectional plates. which you will see by above cut, take care of every inch of the edge of the outer cusing. Next we vulcanize a three ply reliner in every tire, making It as smooth for the tube as any new tire. Ity our system we are putting to work again, hundreds of tires that

formerly were thrown on the scine Scores of men have written un from different parts of Ontario about

the great mileage they have had, and What did it cost them: For oxample, take two 30x314 tires, one is rim cut but still has a fair amount of rubber tread, the other has a good rim and fabric, but the tread is worn off. We take these two, and make one out of them and send back a completo tiru ready for the car for 46.60, express charges would amount to about may \$1.00, in all \$7.50, Some write they have had 5, 7, 10, 12 and some bus soltes beands of ca daid ca that from tires they could not use any more. If interested write us and we will send you our price list covering

other sizes. 100 per cent, puncture proof, take a 30x35 tire, it has four layers of fabric. We double them, it now has eight, then we ruline it with a three-ply rollner, it now has eleven layers of fabric all thoroughly vulcanized together. You can readily see tacks and small natis have no chance. A fuir trial is all we ask. Use a good tube and do not allow air pressure to go below to lbs. and you will

gut the best of results. When sending us tires prepay express charges. TAYLOR & RYAN Successors to J. H. Cay and Co.
