

# The Acton Free Press

THURSDAY, OCTOBER 16, 1919

This Acton Free Press is published every Thursday morning at the Press Trust building, 1111 Street, Acton, Ontario. The subscription price is \$1.50 per year, in United States. The date to which subscriptions are paid is indicated on the address label.

**ADVERTISING RATES**—Transient advertisements, 10 cents per line each measurement for first insertion and 5 cents per line for each subsequent insertion. Contract display advertisements for 100 lines or more per annum specific directions will be inserted till further and charged accordingly.

H. F. MOORE, Editor and Publisher.

Editorial and Business Office: 1111 Street, Acton, Ontario. Telephone: 1111.

## EDITORIAL

Indications point to fair probability of arriving at a reasonable settlement of the Irish home rule problem in the near future. Parliamentarians say the Irish bill will be the feature of the new session of Parliament. The Cabinet is now considering a bill drafted on lines of Dominion home rule, but with suggested alternatives that any county may stand out, or Ulster counties be included and have their own Secretary of State.

Labor leaders declare that prohibition has greatly assisted in the task of maintaining order during industrial disputes. Surely the people of this Province are not going to return to the open bar by voting "Yes" on the Referendum. The advantages of the War Measure are so apparent that many who were impressed by the cry of infringement on personal liberty have upon fuller consideration become converts to the present Ontario Temperance Act. It is "worth while" to keep it in force and effect.

It was naturally to be expected that trade depression in the Dominion would have followed the armistice but this was averted by the application of a large proportion of the last Victory Loan as credits to Great Britain and our Allies for grain, dairy produce, fish, lumber and ships. These credits were absolutely necessary and strictly good business. They must be continued. They are national re-investments. The debts will be paid eventually and in the meantime industrial and agricultural workers will be kept in busy and lucrative employment.

The present estimated value of the railways of Canada is two billion dollars. That does not include the street railways which are valued at one hundred and sixty millions. Canals are worth one hundred and twenty three millions; shipping, thirty-five millions; telegraphs, ten millions and telephones, ninety-five millions. These quantities are a portion of the security for the Victory Loan 1919. The estimates are made by Dr. P. H. Coats, Director of the Dominion Bureau of Statistics at Ottawa. He places the total of the national wealth and income of Canada at \$10,002,788,125.

The necessity for thrift is everywhere manifest these days. Saving is not always looked upon, however, as a saving grace. If it were, there would not be five per cent. of the inhabitants of the United States who are dependent upon public charity. During the past five years practically all commodity prices have risen steadily yet vast sums in the aggregate are now being spent for goods that the purchasers could very well do without. The production of luxuries requires the labor of thousands of men and the use of capital and materials that could be turned to better account in producing and distributing necessities. It is surely obvious that such needless expenditures influence in a marked degree the trend of prices in general. No right-thinking nation or individual desires to become a pauper, but to avoid such a fate thrift is a prime essential. At no other time in the history of Canada has thriftiness been more imperative. At no other time has prodigality been so much the rule.

The time has come when our municipal authorities must take action to prevent violations of the Motor Vehicles Act in this town. Violations by excessive speed, non-observance of the road rules, neglect to carry lights, etc., have gone on with impunity for years. It was stated long ago that it would require a serious accident to stir up those responsible for the administration of the law. That accident occurred on Saturday of last week to an elderly resident of Crewson Corners on one of our main streets. The brutal perpetrators of the accident drove off without paying any attention to the extent of the injuries they caused. It is clearly a positive duty of the Council, without any further delay to appoint officers with authority and instructions to enforce rigidly the provisions of the law. The magistrates of Acton are quite ready to receive and act upon all information for violation of the Motor Vehicles Act. They cannot impose penalties unless information is laid and evidence forthcoming. A few examples made would soon teach motorists that the law must be observed and the danger to children and the public generally would be thereby greatly lessened.

The people of Acton regard the waterworks project with genuine interest and few but favorable comments are heard respecting the Council's decision to submit the question to the voters of the town on the 31st inst. It is generally felt that the installation of an adequate waterworks system will be of incalculable advantage to Acton. It will at once give a prestige of decided commercial and financial advantage. We have suffered for years from the lack of this modern and very necessary municipal utility. Waterworks will provide householders with good water for all household purposes conveniently at hand; will enable them to put in modern conveniences which add greatly to the comfort of the home; will safeguard the water supply in case of an epidemic; will be available to manufacturers who would not otherwise entertain any proposal for settling in Acton; and perhaps most important will give protection to property from serious losses by fire. A fire might sweep the town any day which would cause losses far greater in the aggregate than the entire cost of a waterworks system. All progressive citizens favor the waterworks project.

In view of the fact that the war decimated so largely the man power of the world, conservation of our resources was never so necessary as to-day. During the war we have necessarily been wasteful, as all considerations of expense were subordinated to one supreme object. But this waste not only cannot continue, it must be made good so far as possible. People must learn to conserve, if Canada is to maintain her position as a thriving, prosperous country.

The pay envelope is a vital feature of every working man's experience. A pay envelope crammed with \$75,000,000 is not an unwelcome thing to receive, even if it is for a year's work. This is the amount of wages earned by Canadian investors in the Victory and other War Loans. Rather it is the amount earned by their money. Close to half of this amount is to be distributed to the fortunate investors either on November 1 or December 1, just in nice time to be re-invested in bonds of Victory Loan 1919. People get ahead financially, not by spending interest returns on everyday things but by setting the returns back to earn more interest. Money, placed that way, rolls up like a snowball.

Those who have the advantages of Rural Free Delivery with personally owned boxes for their mail, would confer a favor upon the mail carriers and the general public who desire to call at their farms, if they would keep their names legibly stencilled on the mail boxes. The name of each person on the Rural Routes was carefully printed on his box when it was supplied by the government. More than this, a stencil bearing the name which appeared on the box was enclosed with the other fittings. In driving along any of our highways it is observed that many of the rural route patrons have grown careless, for many of the names are not decipherable. A small brushful of paint over the stencil would brighten up the name, then there would be no guesswork by the carriers and people driving along the farms would be able readily to identify the owners.

Next Monday the important election of the Temperance Referendum takes place. A most important duty devolves upon every elector. If barrooms and liquor stores are to be kept out of Acton there is but one way in which this can be assured. Mark an X in the NO column opposite each of the four questions on the ballot. Father! as you look in the bright eyes of that fine growing son of yours dare you vote to put the temptations of the barroom and of the liquor store in his way? Mother! with such a heart of love for your children, and all children, can you conscientiously shirk your responsibility of casting your vote against the great and infamous evils of the liquor traffic? Elder brothers and sisters! when you recall your recollections of the misery and want and wickedness of the liquor traffic in the past can you do otherwise on the 20th than vote to protect the kiddies and assure them the continued comforts of a happy home, plenty of clothing and abundance of wholesome food. Let us all vote four XXXX in the NO column of the ballot and banish the drink evil forever.

H. S. Arkell, Live Stock Commissioner, who has recently returned from a trip to Europe where he has reviewed the live stock market situation, has expressed his views regarding Canada's position, in the October number of the Agricultural Gazette. He states that the London agents of our Canadian packers reviewed in disappointment the orders for Canadian goods—bacon, eggs, etc.—for which they could obtain but a tenth of the product they required. The unwarranted high price of hogs in Canada during the past month is but a reflection on the reputation of Canadian bacon, as compared with American, and demonstrates the effort of our packers to maintain their connection with old established clients in the face of short supplies. Since Denmark, within a year, will again be a factor on the bacon market our only security for the future is full production and such a substantial export supply as must command recognition by its volume and quality. Short hog production is unquestionably the most dangerous policy Canada can adopt. This is true of eggs as well as bacon.

## REFERENDUM NOTES

Members of the Liberty League may feel that they're at liberty to say any blamed thing they like, so long as they can get away with it.—Toronto Star.

This Province cannot ignore the fact that drunkenness increased in Quebec after the light-wine-and-beer system was introduced and spirituous liquors shut out, there being no less than two thousand cases of drunkenness in Montreal in five months.—Exchange.

There is only one way to make certain that King Alcohol and his court shall not be restored to power in this Province, and that is to give such a majority of "Nos" to every question on the Referendum ballot paper that the next Legislature will have no difficulty whatever in realizing that public opinion is determined to keep Ontario dry.—The Globe.

In the belief that liquor has done a great deal of evil, and that organized society has temporized with it too long, we advocate prohibition and urge the people to go to the polls and vote four resounding "Nos" on election day. A sweeping verdict is what the case calls for. Whatever steps are necessary afterwards to give effect to public opinion will follow in due course.—Star.

The Government at Ottawa is prepared to make prohibition "bone-dry" in this or any other Province that declares its will in the matter. The first step is for the Province of Ontario to make an overwhelming declaration for prohibition in the vote on the 20th inst. The next step will be for the Federal Government to see that the will of the Province is not flouted by a liquor trade operating from beyond its borders.—Exchange.

The grand outstanding fact in this controversy is that the world has enough to do at present to feed and clothe everybody, without besotting itself with foolish drink, wasting substance, money, time, happiness and everything on drink. There is no question of "holy willies," as some impertinent person called the prohibitionists. The liberty-whiners are a laughing-stock and an anachronism. Canada cannot afford to be fool-ridden.—London Advertiser.

## Open A Housekeeping Account

with The Merchants Bank, and pay all bills by cheque. By depositing a regular sum in a Savings Account, you know exactly how much is spent on the different branches of housekeeping.

When you settle by cheque, you avoid all disputes as to payment, as the cancelled cheques are receipt and proof of payment.

This business-like method of home finance often prevents paying the same bill twice. Savings Accounts may be opened in sums from \$1 up, on which interest is allowed.
