THURRIDAY, HIGHTIGMINICH" 2, 1920

FIND A WAY OR MAKE IT It was a noble Roman In Rome's importal flay, Who heard a coward croaker Hofore the cautle say: They're water in much a fortread There is no way to shake it! "On-Ont" exclaimed the hero,

"I'll find it way or make it!" Is fame your inspiration? Her path is steep and high; In vata he wooks hor temple Who's content to gaze and sigh; The shining throng is waiting Hut he alone can take it

Who says with Roman firmness "I'll find a way or make it!" Is learning your ambition? There is no royal road; Alike the poor and pensant Must allmb to her abode; Who feels the thirst of knowledge.

-John G. Haxe.

If he has will the Roman will.

"I'll find a way or make it!"

In Helicon may wlake it,

THE THIRD BOY

for three boys to make a speck o' money up to Kph Wheeler's," remarked Caleb Bawtelle from his seat behind the stove in Ira Macomber's general store, uddressing the usual group of loungers goin to haul it to the depot an' ship and produced an immense amount of Old-timers even claim that it put footed mules were a marvel.—C. G. stops because of the chill of the fall air, "That is, thur would be if Eph's place wasn't so fur from the sidin' up to the depot."

"What's kiph got to offer?" questioned Hilas Cameron, reaching styly into an adjacent "cracker barrel and 'abstructing u bit of oracker which he proceeded to munch.

"Eph wants to get rid o' all thet 'go," replied Hawtelle, likewise reaching loto the barrel. 'Told me this mornin' that he'd give it to anybody that 'ould carry it off. Most the hull on't is hickory. Has stood thar until it's dried harder'n flint. Can't do nothin' with it, usin' an ax. 'Bout two strokes o' the ax, an' the edge 'ould be gone. Wood like thet 'ould sell like hot cakes down to the city. Cut up into stove-lengths 'most anybody 'ould give fifteen dollars a cord for it."

"Why three boys, Caleb?" questioned the storekeeper. "What 'ould be matter, tacklin' it?"

Ira?" questioned Sawtelle, grinning. Ye-ou seem to have got the bull thing and know they ought to dot" Then pleasing to the eye in type, form and "How many does it take to run one all figgered out."

It's layin' on the sawhorse? Thar's length the time came that it became a window. There we lay until it was that is not a particularly fine inwhar the third boy 'ould come in right advisable to see about the car, so, all over, watching the rain and hall dividual in type but the studies her handy. Two couldn't do nothin' skeer- going to the city, they decided to make strike the roof near by. Later the pedigree and finds that she has for ancely usin' a crosscut. The log 'ould one job of it-see the superintendent children learned to count between the count network the count between the count network to count between the count of the very best uniquely be dancin' round like a crasy cricket, and go about the city in search of flash und the peal of thunder to see of the breed. He decides to buy the arter a few cuts was made."

"Guess ye're right," remarked the storekeeper. "Never thought o' thet. think on't."

window of the country post office, there engaged at fifteen dollars a cord. in the general store, the while waiting ! for the coming of the evening mail following morning began the hauling storm occurred at night in the early ducors is much more liable to be the he had been thinking of the several of the wood, pending the arrival of days of this treatment, I always closed acres of burned over woodland up on the car. There was good sledding, and and durkened their room; and if, one dam only, of all ancestors is a prothe Wheeler farm. He had been all that first day they hauled four cords should waken, I stood healds him rethrough there z month previous with down to the spur track. The next day assuring him until either he went to hold true. Just as we frequently find his brother Tom, and now he had a they did as much more. The third day sleep or the air was calm again. Some picture in his mind of the numerous the car arrived and then they spent people thought I was, teaching the dead trees left standing by the flerce the greater part of a day snugly pack- children to require special attention fire which had swept through there ing aboard that which had been trans- at such times, but it has not worked the previous fall.

The mail presently arrived, and having been sorted, Alonso took the letter and stow it away in the car, but at upon me, and I find that my own handed to him and started for home. last the work was completed, and he | nervousness-often morely a name for muttered as he walked along the coun- a trifle over fifteen confs. try road toward home. "I can rig the 'third boy.'. The most trouble will be notified the agent at the depot, and getting the wood down to the freight." during the night the car was shackled Suddenly he stopped and looked down city. There he saw the headlight of a loco- went to the city, and there hired a in Uruguay calls upon the president of

The road isn't using that track the boys decided that the eight or ten and similar drinks and does away with now, and probably won't before another spring.

That evening Alonso talked the matter over with his mother and brother balance of the wood. This they work- places where crowds assemble. The Tom. His father was dead, so all his od up fast, as they out it into odrdbig plans for the future he confided wood lengths, being anxious to get it to his mother. She knew all about home before the heavy winter snows their aspirations-how much, they made too difficult the outting and free list both us to import duties and possibly a single defect may be notice. wanted to go into the poultry business hanling. Inside of a week it was all internal taxation. As to absinthe and od through the entire herd. The owner on a large scale. They had talked it piled in the yard, where they could over a good many times, but somehow. work it up at their leisure.

"A strap will make a good boy," re- a success on't?" manded Tom.

"Well it is just here," replied Alongo, an' the next day he un' his brother we don't need a third boy when it was ready to duff right in. Eph told comes to felling one of those dead me that they cleared up bout two

have lifted it onto a solid sawhorse. 'Ill make a success o' the poultry busiwe will say. Now we need to have ness; mark my word on't." somebody, or something, steady it "Irs, I have a notion ye're lest 'bout while we are working the crosscut right," remarked Euwtelle. "The way saw; all right, here it is-two stout 'Longo figgered out the 'third boy' straps, one end of each fastened to the makes me think o' the old man. Ye ground on each side of the sawhorse; couldn't stump him, lie'd figger somestout wooden pegal driven into the how to get long with what he had to ground through rings in the end of work with, an' he did purty well all the straps hold them fast; the other his life. Had had luck 'long the ends we bring up over the tog, and on't-that bank fallin' down to the pulling in hard, we buckle the two city, but thet wasn't his fault. Yes, straps; there is Mr. Log as steady as Ira. Y think as ye-ou do, them boys

make a good boy," "Longo, you're a wonder!" exclaimed Tom. "Let's go up and see Mr Whoeler the first thing in the morning. I just know we can make a lot of money out of that wood. If worst comes to worst, we could, on a pinch, team it to the deput, but that is five get u box car left on the gravel pit siding, it would not be over half, a mile that we would have to haul." The ensuing morning Alongo and Toni went over to see Mr. Wheeler. and when they told him that they wanted to clear his land of the dead wood, he laughed and told them to go

how jest two on ye is goin' to do it. how jest two on ye is goin' to do it. fused. Behind her sat a little eight. but sompin' tells me that year-old, who raised her hand and him whether to take the turning to the other, upon us. A kindly, helpful set right or left, and yet he is better of gratitude to him headent like the one-reported, in pass-

dity, and there managed to get a persoul interview with the supetinten-

ent of the road. Porhaps it was because the official was koon for husiness that he duallynonwented to have a box par shunted onto the gravel pit spur track later on when it was wanted, but it is far more probable that his inind harked back to his own boyhood days, and he found pleasure in extending a helping hand to the youth before blun, and the brother he had spoken of a

The following day Alonso and Tons siturted work on the dead trees, Their promentt and was sharp and well set and in short order the bone-dry trees Were crashing to earth. While Alongo was in the city, Tom

had constructed a strong sawhorse, and locating two solld straps in the burn, he had sowed-two rings on, rings three inches in diameter. The buckles were already in place, so that everything was ready for an immediate tryout of Alonyo's plan.

Lifting the first tree onto the sawhorse, Alongo drove in the negs and a moment later pulled in on the stran and when he figured that the fred was securely fustened, they picked up the saw and began work.

"Talk about a 'third boy!" excisimed Tont us the first out dropped off "Those strape beat any loy that ever lived, for holding fast. A man weighing three hundred pounds couldn't hold

It so steadily." During the morning Mr. Wheeler come out to where the buys were ut work, and grinned when he saw the

an' I could have done it. Course it a townsite was laid out.

"We are going to haul it down the hill to the gravel pit," replied Alonso. I MAN the superintendent of the road TO CURE THE FEAR OF THUNDER yesterday, and his promised to have a car left there when we needed it."

"Ye don't mean to say that the rullroud is goin' to 'commodate ye like thet!" viaculated Mr. Wheeler, "Wall now won't that be neat! Tuln't but bout half a mile down thar. Y do dodead wood up what the fire was year clared like your coone o' them box care carry?"

"From twelve to fifteen cords," replied Alonzo. "I enquired about that." maybe two wouldn't come umiss. I each child at a very early age showed that may be good business for down to the railroad on a sled."

Some day before long we are going to things while the storm lasted was of I do not like her breeding," the city and carry along two or three no avail. They tried not to be fright. THE CABH VALUE OF AN ANI-MAL'S PEDIGREE

All animals have a podigree of some stricken to you for protection? Road sort whether pure-bred or scrub. Only | tendance. He was absent so often How one Home Council mother cured the pure-bred animals have their pediher children's fear of thunder: Ite- gree registered and have pedigree cer- a note to his parents, us follows: prembering my life-long struggle tificates bested. A pedigree is valuable early determined that my children worth while about an animal, either should escape the anxiety that had favorably or otherwise. We frequently always beset me the minute the sky hour comments of some such nature "Wall, ye'll need one car sure, an outward carry that I could display, is the cow I want." Speaking broadly persume ye'll keep sawin' until thar's fear during storms. Whether it was butaler but the rest stock breeder, is snow on the ground, an'-then allp-it born in them or acquired from my paying more attention to pedigree than real feelings, I cannot tell. My at- over before and we often hear him "You, that is what we intend to do, tempting, to draw attention to other | way "that is a beruiful individual but

said to myself: "If only I could make cow that has had a brilliant show-

docides value by ustablishing the hisdam of producers than the cow whose ducer. This does not of course always a good individual with a poor line of uncentors, so do we find neor individunis with strong uncestors. Like, as n general rule, produces like, but the law of variation is also felt. The pedigree student studies these laws and draws his conclusion.

When a cow 'le purchased for breeding herd two things are kept in mind, first the value of the cow for what milk she will produce and secondly the effect she will have upon the future of the herd. A good Judger of dairy cuttle can estimate closely her value us a milk producer but her worth as a hord improver must be determined chiefly by pedigree.

Individual merit le very important dividuals who have apparently aprung from inferior stock and later have become wonderful foundation cows. Sheh animals are valuable if preperly developed, but the owner must have skill and pationco, to hundle a problem of this kind us often, after a few generations, there may lie a reversion back to the old ancestral type.

Home herds have been built almost Non-alcoholic drinks are placed on the to perfection with the exception that similar drinks, their importation, man- is a true stock breeder and wishes to nfacture and sale are absolutely for- have as perfect a hord as possible.
