NEARER, MY GOD, TO THEE

Barth Flower Adams born in Great Harlow, England, February 22, 1896, died in New York August 19, 1921, author of the hymn which is the best known of all those written by women. She was the daughter of the editor of the "Cambridge Intelligencer" and the man, Mr. William Adams, a celebrated engineer and inventor. Though written as recently as 1846, this hymn stands among the foremost in the list of standards and hymns of the Christian Church. In the last hundred years it would be impossible to find a hymn from which it is omitted. This may be due, in part, to the time in which it was written, the author being an American churchman. Dr. Lowell Mason, "Bethany," is wedded to the hymn in America, while in England, where it is sung in other tunes, it is not nearly so well known.

Nearer, my God, to Thee,
Never so nearly I have been
To Thee, though I have been
That rabbeth me;
Still all my song will be,
Nearer, my God, to Thee,
Nearer to Thee.

Though like the wanderer,
The sun goes down,
Darkness be over me,
My way is done;
Yet in my dream I'd be
Nearer, my God, to Thee,
Nearer to Thee.

Then let the way appear
Blaze in my heart,
All that Thou commandest me
In mercy give;
And when I am in pain
Nearer, my God, to Thee,
Nearer to Thee.

Then with my walking thoughts
Bright with Thy praise,
Out of my joyous griefs
Blessed I'll go.
By my woes to be
Nearer, my God, to Thee,
Nearer to Thee.

Or if my joyfulings—
Cheerless the sky,
Sun, moon and stars forgot,
Upward I fly,
Still in thy keeping shall be
Nearer, my God, to Thee,
Nearer to Thee.

ICE CREAM AND WAFFLES

Make flanque ice cream. One quart medium thick cream, one tablespoonful of vanilla extract, one teaspoonful of almond "extract," one cupful of brown bread-crumb, three-quarters of a cupful of sugar.

In a cupful of cream, add the sugar, allow to cool, then add remaining cream and flavorings. Chill and freeze; when the mixture reaches a thick, mousse-like consistency, remove and set in the bread-crumb. Continue the freezing to insure thorough mixing, remove the dasher and pack.

Additional flavorings are used for the vanilla flavor, ice cream, brown bread-crumb makes a satisfactory substitute. When several flavors are used in "ice cream," as in the above recipe, add more time for ripening or blending.

Peach ice cream is made with five cupfuls of milk, or half milk and half cream, three cupfuls of sugar, one cupful of cream, the juice of one lemon, the peach, mint and nutmeg with the sugar and lemon-julep. Hold one-half the quantity of nuts, cool and use whipped cream, sugar and mint cream. Three cupfuls of strawberries, cherries or red raspberries can be substituted for the peaches, or a cupful of crushed pineapple can be used. Fruit must be thoroughly mashed, then strained, or it will freeze into pellets.

Water ice are delicious but lack the food value found in ice cream, therefore are not particularly recommended. In making water ice, boil the sugar and water together for just five minutes by the clock and remove the bowl when hot strain the syrup through a cloth, add the fruit juice, adding the fruit juice. Pack the freezer as for ice cream. Turn the crank slowly for a few minutes, then rest five minutes, turn the mixture, add frozen fruits. It takes much longer to freeze water ice than ice cream. When you can no longer take out the spoon, turn the heat under the freezer with a paddle. Then repeat as with ice cream.

Orange water ice: Add to the syrup one cupful of orange juice and a pint of water. The juice of six oranges and one lemon. Hull a few strips of the yellow orange rind with the syrup.

Grape water-ice is excellent and is made with one cupful of grape-jelly and the juice of one lemon added to the syrup made with one cupful of sugar and a pint of water.

Bear's milk: One cupful of berries mashed with three cupfuls of sugar, the juice of one large lemon, six cupfuls of water. Make a syrup of the sugar and water, add the fruit, mix and freeze.

Frozen cherries require three pints of cherries to a pound of sugar, and a pint of water. Mix and make the cherries stand a day or two and then pour the paste to the cherries. Let this mixture stand one hour. Mince a syrup with the sugar and water, strain the fruit and add the juice.

Place the mixture in the freezer and partially freeze before adding the cherries.

Rhubarb sherbet: One quart of black raspberries, six cupfuls of water, the juice of one large lemon and three cupfuls of sugar. Let the berries come to a boil in water, wash them through a fine sieve, add the sugar, cool, then add remaining water and lemon-juice, and freeze.

Lemon milk sherbet is made with two quarts of milk, one cupful of sugar and the juice of four lemons. Blend one quart of milk, cool, mix the lemon-juice with the sugar, add to the milk and freeze as once. Never is there any danger of the milk curdling, if the milk curdles for the milk should always result in a smooth sherbet.

TO TRANSFER FEATHERS

To transfer feathers from one flock to another, rip along one edge of the old "flock" and leave an opening of about one inch. Join the edges of the two coverings and hang them out of doors or away from the wind. The feathers will gradually work down into the lower portion, and the new flock will help to hold them back by occasional beating. When all the feathers have been transferred, rip the "flock" apart carefully, pinning together the edges so that none remain. Close the opening with strong, waxed thread.

WE MUST PAY THE PRICE

"If you want knowledge," said Little Miss, "you must pay for it." Little knowledge comes as high as any other kind. If you want it badly enough to pay for it, your class will probably be the first to learn it. The problem of attendance will be very largely solved. The absentee committee will have a circumspect evidence.

"Billy Youngford's baby is beginning to talk, and one of his best friends is another."

"Why has he been boring you with stories about it?"

"No, but I must hit him at lunch today, and I need him say a decent word about the waitress. 'Dimps' looks dismally at me."

"Well, now, bless me, if I haven't

used up nearly all the space for the trunk, the root, the dead chestnut tree, and hardly a quarter column left to devote to the second line of recitation."

Last week I closed with the home-staff farm and the family of sixteen children and their unengaged sons and daughters.

Well, the next farm below had a brother, and the son of that brother, who was the daughter of the editor of the "Cambridge Intelligencer" and the man, Mr. William Adams, a celebrated engineer and inventor. Though written as recently as 1846, this hymn stands among the foremost in the list of standards and hymns of the Christian Church.
