. A New Idea for the Fall Fairs

The Listowel papers unnounce that the prize lists of the local exhibition to be held next fall are now ready for distribution. The Listowel exhibition directors' have gone a long way towards insuring the success of their show by getting their prize lists out so early in the season. The majority of fall fairs, Acton as well as the usual fall fairs, do not get their prize lists out in time to be of much advertising value to the fair. If the prize lists were issued not later than say June 1, in each year, exhibitors in every department would have some reasonable time which to prepare their entries. This would be especially true in the ladies' departments. As it has been in the past, there is no time after the lists are issued for the ladies to get ready any new fancy work or articles of domestic manufactures.

### Radio Wireless Possibilities

mission and radial railways. Sir John Willison, who since his retirement from the position of editor of the Globe, has been a free lance upon public ques tions, refers to the matter in rather an interesting nations are saying so. The people of Ontario may and logical manner in the current number of the congratulate themselves on the fact that they have Canadian Magazine. He says: "No evidence has ever been produced to support any whisper against Sir effective administration behind it. In no other way Adam Beck's integrity.' It is impossible to believe that any such evidence over, will be produced. It would be merely stupid to deny that the Hydro-Electric system has brought great advantages to Ontario or to question his devotion to the great project. But Sir Adam Back is not a god and "public ownerprinciple and still be a good citizen. That the Hydro- This speaks well for Alliston's credit. Electric system will ever be turned over to private Control is beyond belief. But it is proper enough to consider how far the system may wisely be extended, how far the public credit may be pledged for the projects of the Commission, and what authority, if any; the Government and the Legislature should exercise over the Commission. It is no new thing to have estimates exceeded in either private or public undertakings. But if there is any prospect that the estimated cost of radial railways under the direction of the Commission will be as great exceeded as the estimated cost of the Chippawa Canal has been exceeded, the Government would be infinitely careless if precautions were not taken to guard against any, such result. Moreover it is dangerous to proceed on the assumption that Provincial guarantees of revenue carning enterprises lay no actual obligation upon the body of taxpayors or do not actually increase the debt of the Province. That was a favorite argument at Ottawa when Parliament was guaranteeing hundreds of millions of credit for the construction of steam railways, but to our cost we know a good deal better what guarantees, means than we did ten years ago Besides, when money is easily got it is easily spent. We cannot afford to overbuild radial railways in the Electric Commission, the municipalities and the Provincial Government have a common interest and that there are no sound reasons for the suspicions and misunderstandings which have developed." . Unfor-

### Unnecessary Talk by Parliamentarians

Those who follow the proceedings in the House of Commons and Provincial Legislature cannor help but be amazed at the amount of arrant nonsense introduced into the discussions. No effort is apparently made to expedite business by elimination of matters which are of little weight and which have no bearing whatever on the big problems confronting the pried will go still higher. country. If the inteligence and ability of some of our legislators is to guaged by their activities in Parliament, the least that can be said-is that some constituencies are hadly represented .- Collingwood

### The Price of Wool and Wool Products .

The total wool clip of Canada for 1921 was ap proximately 21,251,000 fbs., as compared with 24, 000,000 lbs. in 1020. At an average value for unwashed wool of 14 cents per lb., the total value of the wool clip of 1921 amounts to \$2,975,000, as compared with \$5,280,000 in 1920, when wool brought 22 cents per pound. The low price now prevailing is most discouraging to wool growers, especially as the spread between the prices for raw material and finished product is so abnormal. The price paid for wool to-day is less than one-fourth of the price paid in 1017, 1018 and 1019. Yet the prices for clothing have not yet fallen one-half and even one-third from the prices for finished garments which prevailed in those years.

### Make Acton Attractive to Outsiders

An observant visitor from a western American city, while in town a week ago, said to the Fuge Puess: "I think your have a fine little town here. Your homes look nest and attractive, your streets are tidy, your people seem to be busy and there is a general air of prosperity about Acton which is observable. I think in the summer time when the trees and shrubs have their foliage and the flowers are in bloom that you must have a most attractive place." This is encouraging to all who are endeavoring to do their quota in making the town beautiful. Nature is now doing her best and has made much progress the past week. Acton's citizens are pretty generally alive to the possibilities and many of them did considerable cleaning up on Friday and Saturday. Others will now no doubt take the hint and remove the winter's accumulations of tin cans and other rubbish from the backyards. Two virtues Acton has simed at for many years are a tidy attractive town and sanitary conditions at every home.

Wonderful Decline of Drunkenness Under O. T. A. .The matter-of-fact annual report of Chief of Police Dickson, of Toronto, is used by the Daily Star to impress upon its readers striking testimony to the benefits of prohibition, and the ban imposed on liquor importations since fast July. It says: If one-half the stories about the ineffectiveness of the Twenty-five or thirty years ago electric light and Ontario Temperance Act were true they would be power and the telephone were comparitive novelties. reflected in startling figures in the statistics of crime Their development to present day possibilities were and drunkenness. As it is generally assumed that Alette =107650= first prize cow at

undreamed of by the most sanguine. To-day radio prohibition makes its poorest showing in the large wireless telephony is providing marvellous interest centres of population, the figures for Toronto, the and entertainment and its possibilities are also be- largest city in Ontario, should provide the worst I reglatered two-year roan bull, good yond conception. Its development will be much more evidence against the Ontario Temperance Act. Yet rapid than its related predecessors. The very rapid the Toronto Police Court figures for drunkenness, extension of radio transmission within a few months disorderliness and vagrancy make this remarkable has struck wonder into the minds of men as to the showing; Cases of drunkenness in 1914, 14,247; in universal adaption of the wireless. Its introduction 1921, 4,727; disorder, 2,734 in 1918, and 1,084 in into the wilds of the far north countries and other 1921; vagrancy, 2,015 against 1,053. A total of distant places of the earth is going to accomplish 18,906 against 6,864 in 1921. These unbiased official great results. The weary merchant or professional figures speak in elequent terms. The leaders of the man may enjoy in the quiet and privacy of his own "wet" propaganda cannot dodge the significance of home concerts, lectures or sermons by the most these comparitive figures. The Star says: "The story fresh, calf at foot; 3 yearling atoers. talented or eminent personages. Those of us who of the moral and social benefits conferred by the O. live another 25 years will see wonderful progress in T. A., which is so coldly, if convincingly told by police scientific discovery and achievement along this line. court statistics, warrants the opinion that the propaganda of the "wets" against the act is one of the Radial Railways, Sir Adam Beck and Premier Drury most remarkable instances of humbugging on record only used a little, pipe for 35-foot allo; The people of Ontario are much interested and in this province." Year by year it is now being forced in this province." Year by year it is now being forced in trucks complete: I seed delile more or less perplexed over the respective attitudes upon the conviction of humanity that somehow the two-sented covered buggy, pole and of Sir Adam Beck and Premier Drury respecting the use of "wine," "strong drink" that makes a man a set sleighs; Forks, hoes, chains, relation of the province to the Hydro-Electric Com- mocker, a brawler as the Scriptures say, with such "HARNESS-1 set team harness, lisastrous results, must cease. The day of universal tectotalism is coming. Individuals in vast multitudes double driving harness, complete; are saying so, communities are saying so, mighty
