A SERMON IN LITTLE

There are days when you are tempted to throw up your job, when you are sick at heart, when you see other things doing wonderful things in other directions, and you are sorely tempted to join them.

We carry this theory into practice on every repair job entrusted to our care. Our custom of doing a little more than is necessary rather than a little less territory. It will lengthen the life of yours. Run it in and let us look it over.

Who Pays For Advertising?

This is a direct and reasonable question; and in the case of newspaper advertising, intelligently used, the answer is simple: Nobody. It pays its own way.

Nobody pays for the new carburetor that gives added mileage to your motor car. It pays for itself in the gasoline it saves.

Nobody pays for an improved cash system in a modern departmental store. It pays for itself in economy of human time.

Nobody pays for well planned and written newspaper advertising. It pays for itself by reducing the cost of sales and by increasing production. And it often receipts old bills for follies with advertising labels.

The advertisement in your own local newspaper tells you the best things to buy and where to buy them. Every new purchase helps the whole community to get, mand cheaper and better goods.
