#### EDITORIAL

#### Better Times are at Hand

What is the truth about the boom which seems to be so much in evidence in the United States asks a high financial authority. Has it come to stay, is it built on a solid foundation, or will it be followed by a period of deflation? There is great activity in nearly every line of business, factories running overtime and railways preparing for a record year. Most people prefer not to call it a "boom"; they say the country has ascended to a higher plane of prosperity. This they account for upon the theory that the "buyers' strike" which followed the deflation of 1920, the agricultural crisis of 1921, and the industrial troubles of 1922, curtail production and restrict credits. The demand for increased production, the general inflation of prices and all the signs of a great business revival, they say, follow naturally upon a three-year period of depression.

#### How Some Councils Do Things

Council which doesn't know its own mind-when a the prairie and other agricultural regions. Better become so fond of his new home that mistake is made one day it is just as likely to be prices for farm products are helping the Canadians and chain that fastened him securely corrected the next. In granting Chief Fyvie's request as well as the farmers in the United States. As the to the kitchen door. for additional policemen, on Thursday, after turning Canadian farmer was slower in feeling the good anish his supper, and the little animal down the same request on Monday, the Council is effect of this increase in prices of farm products, not exhibiting any noteworthy amount of consistency, so he will enjoy it longer." but this may be forgiven in light of the discovery that it can realize when a mistake has been made. The old proverb that it is never too late to mend holds just as good now as when it was first propounded and now that the Town Council has duly a majority, yet when the vote on-the Budget was thought better of the amazing decision of Monday taken last week it had a majority of eight. To all all locked. He can't get out" when Chief Fyvie was told, in effect, that vice con-appearances it is always safe on-a division. ditions could continue to increase for all the majority of the Council cared, gratification may be freely expressed that the Council can change its mind, even though there are times when it hardly appears that It has a mind to change.-Sudbury Star.

#### The Election in Halton

fired off later as the polling day approaches. A big Almonte Gazette. effort will be made to get all available voters on the new lists to be prepared under the Ontario Voters' young men, they will vote for the candidate that most at the polls. appeals to them, regardless of their political leanings. Under the new act it is possible, if not probable, that 20,000 votes will be cast in Halton, where under the old franchise act there used to be around Gin and ground to cover before election day. Where was only one ballot. formerly only one week was allowed between nomination day and polling, now there will be eleven days, on account of the extra number of ballots to be printed and distributed throughout the ridings .-Milton Reformer.

This is also the experience in this feast. It is a kindly warning against county. There seems a desire on all sides that every the fully of indulging in the things man and woman entitled to vote should be entered minder that all excesses must be puld on the lists for the forthcoming election.

## What Canada has Accomplished for Industrial

There has just been published a complete report of the proceedings at the National Conference on Scientific and Industrial Research, held at Ottawa in February. The book constitutes a valuable record of what has been accomplished in Canada to date in the interests of reasearch, since it contains state ments of the work done by practically all the organizations, institutions, and industries, which have taken up the subject of research and have carried on investigations. The book is also of importance since ally, have not paid for what we have, it yesterday, it presents the ideas of the leaders in research work as to what is necessary to enable Canadians to devote very nature of things that nothing can paper; I negered she was puttin' down more adequate attention to the subject and to provide for it the facilities which its increasing importance flon, health, wealth, wealth, wower, success, was ready to start, she called me into demands.

#### Immigration Likely to be Stimulated

It is expected that immigration will be stimulated by the recent action of the Government in modifying, this true regarding our endeavors, but by order-in-council, the regulations governing the indulgences. Whether we not or full admission of United States citizens. Since February to act, we must pay just the same; 15, immigration officers were empowered to admit dulgance the shirking of the the latter providing they gave satisfactory proof that selfish indulgence than for unselfish that their labor or service was required in Canada. Last month this regulation was changed to allow by which to regulate our lives. officers to admit such persons as could show that they had sufficient means to maintain themselves until employment was secured. In practice, under the former regulation, only those having definite employment to which to proceed could enter, while, under the new regulation, any United States citizen, with means to support himself, may come to Canada in search of employment.

#### Predicts Prosperity for Canada

A neighborly and very interesting prediction is would add to our comfort. He is a made and published in the press of the United States by Roger W. Babson, the well known statistician. He servant in a large camp he finds plenty The next thing she had written was: states that while conditions in the United States may of time for gunning, fishing and other 'Fix up the front fence.' It's saggin'." be better on the whole at present than in Canada, he male and has a good-sixed monagerie predicts that "unless we take care business will be of pets; last fall there were four Belbetter in Canada in 1924 than it will be in the United States. Continuing he writes, "The farming condition is better. Its farmers did well last year and the fruit growing sections had very profitable yields. There is one great advantage in having a Town A more hopeful feeling is developing, however, in but Andle Instant he would moon bur. It was a job I'd have hired in
