THURBDAY, JUNE 14, 1985

THE HOME TOWN great or small. The home town, the home town, is the best town after all. The cities of the millions have the sun and stars above. But they lack the friendly faces of the few you've learned to love. And with their pump and riches und with all the teaming throngs

The heart of man is rooted in the tow where he belongs. There are haunts of dharm and beauty where at times its good to be, But the humblest little hamlet sings i includy to some. And no matter how they travel It calling them to come. Though cities rise to greatness and

gay with gaudy dross. There's something in the which no other towns possess. The home town has a treasure which the distance cannot gain. It is there the hearts are kindlest, there the gentlest friends romain, And it's there a mystle, something seems to permente the air. To set the weary wanderer to wishing he were there.

For be it great or bumble, it holds mankind in thrail, And the home town, the home town, the best town after all.

SHOE STRINGS

there are a great many of them in the you think of the process, it suggests in the work," infinite Wearings such as Jefferson's

they are too short you stretch them of this bridge that it consider and strain them and finally give up number of the pupils reached the jast, hole, and your patience is schoolhouse. Five miles above the likely to prove shorter than the shoe confluence of the two streams was a string. When they are too long, they large dam which held in check a dangle indecorously. But those little large amount of water. A half mile oddities of shoe strings and life-we have to accept and make the best of, was another dam, a massive concrete In the spirit of Milton: What thou tie'st

Tie well, how long or short permit to in this business of shoe strings. The The water was exceedingly high that prudent keep a drawerful of all sorts morning when Jotham grossed the and sizes, and the shrewd depend on bridge on his way to the schoolhouse the prudent. Yet you omit to replace, it, It across in his boat, bringing Jotham. goes when a visitor is waiting, or a his potter's wheel and a quantity duty is calling, or a train is coming potter's clay. When he started back Do you smile or swear? If you can he told Jotham that he would come smile at a shoe string that breaks in and get him in the vicinity of six such circumstances, you can smile at o'clock, thus giving him ample time greater things, even a broken promise, for the demonstration. Don't get neror a broken hope, or a broken heart. Your, son, and you will get along And that smile, not of bitterness or all right," he said as he was about mockery, but of tenderness and com- to pick up the ours. "The main thing prehendion, is about the height of is to keep cool, no matter how many human philosophy, as the wonderful are watching you." Shakespeare well understood when he !. wrote the lines in Twelfth Night:

Smiling at grief, and, long after, the lines in Pericles of his later years:

and smiling Extremity out of act. , Bo a shoe string may lead to Shake-

HOW SEA NAMES CAME

Admiral is not an Engilsh word. Its Arabic for "Lord of the sea." The term captain comes to us direct from the Latin caput, meaning head. The the word opracle, a small round boat used for fishing. Commodore, is nothing more than the Italian Commendatore, or commander. Frequently, we hear about "Davy Jones." There was, of course, no such person, but should you speak of "Duffy Jonah's Locker," you have the original phrase. Duffy is the West Indian negro term for the spirit of Jonah. The term "dog watch" is a corruption of "dodge" watch, the "dodge" being an arrangement 'to prevent men from being on duty every day at the same hours. The starboard side of a ship was at one time the steer-board side, in memory of the Anglo-Saxons who used to steer their boats by putting out on car on the night-hand side of the starn. The larboard (now know as the port side) is a corruption of lower board, which was always considered interior to the

For two days prior to that memorable Friday in April it rained. It just Forehandedness is a great virtue, poured the greater part of the time. and it shows in few matters more than Friday, however, the weather cleared.

Jotham carried his wheel and the clay up to the schoolhouse, and it was like Patience on a monument, not long before the regular afternoon session claimed his attention. As the afternoon wore away Jotham's wrought with the strange imagination nervousness increased. He wondered how in the world he was ever going

Like Patience gazing on kings' graves to get his courage up to the point where he could coolly seat himself at his potter's wheel and demonstrate after his wheel and clay. There he

with it, and the teacher's deak having been moved to one side, he lifted the wheel ento the platform. About that the door. under control. Finally be succeeded in a measure, and seating himself at

the wheel, began work. Jotham was a very excellent workman in the quiet of his father's shop, but now his hands trembled so that seemed utterly impossible for him to turn out a piece of pottery which was

approaching perfection. Meanwhile the water had been stead lly rising. Somewhere in the upper dam there was a weak spot and while the father was busy the dam suddenly gaw way; and with a sullan roar the thousands of tons of water which held in check started downstream to ward the mighty dam of masonry beond the function of the two streams. As that wall of water moved on it spread out over the adjacent meadows, but ever pushing relentiessly forward. When it reached the bridge near the schoolhouse it swept it away like so much cardboard and a few moments later it was backing up against the

It was about that time that Jothum's father left the house to go after his son as per agreement. He was very ters to-night, son, I have come to tion from a speech delivered by, ex- much astonished when he found his rowbroat fully three rode from the "Each year the local paper gives shore. stairs in the foreroom; so I had free ficial watering, but if water is abplace and which spent little money a tiger's head with crystal teeth, the These were the things I was thinking swing to get my things out. And then plied, the sail should be exturated to a elsewhere in the place. The abolition tongue being a solid ingot of gold. son: I had been cross to you. I scolded I couldn't find my biled shirt high nor, good depth and then not watered again of the hotel bar has not only placed Almong the Royal plate at Windsor you as you were dressing for school low. I hollered down to her to know until thoroughly dry. The general the hotel business upon a higher plane Castle is a knife which was presented because you gave your face morely a where it was, and she snapped back: custom of a daily superficial sprink- in the business world; it has made it to George IV, by the cutters of Shef-

MOON HALDES MEAN RAIN

At this time of the year the moon, when riding high in the heavens, is often seen to be surrounded by a perfeet circle of soft light.' Sometimes the ring of light is quite small and Her quite close to the infun's edge. but on other nights oil de energous. so blg in fact that sixty moons placed able by side would be only just endown to apan It.

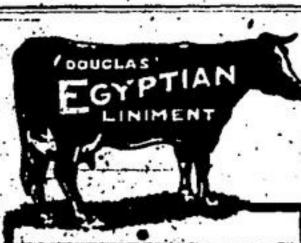

langth between your aye, ugit the moon, flow many fingers do you'think will be needed to blot it out? Try. It and weet you will be surgisted to and that the the of your little finger be quite, duough to cover even the bigged full moon. flut to span one of those great rings you will need all the fingers of both hunds separated to their fullest extent.

Weatherwise folk will tell you that lags round the moon mean a change in the weather. They are quite right, for the presence of the "hulo," as the. ring is called, always mouns that great clouds are floating in the air at least 20,000 feet above the surface of the If the upper layers of the almost

phere are charged with molature, rain clouds are sure to form before very tong; and soon a steady downpour will be falling on the earth below,

Benefits of Advertising

When a store advertises judiciously, it attracts public attention and it increases its business. But the increase of receipts is not usually equalled by a corresponding increase of expense. Most stores could double their business without doubling the number of clerks, or doubling their

rent, light, heat and other expenses. Consequently the charge per article for this so-called "overhead" expense keeps decreasing as the business grows. If receipts double, and cost of doing business increases only 50 per cent., it is manifest that the overhead cost for each article sold is proportionately less. As volume of business is more economically done, and the cost of moving each separate article is reduced. The public gets the difference in

lower prices. The advertised store tells the public. what bargains it has, while the non-adver-

tised store does not. A live enterprising merchant who is a good shrewd, wideawake buyer has bargains all the time. It is his principal job to keep on the look-out for special opportunities. If he is on his job he is continually making a wise selection between good and poor offers, and always has things in his store that represents exceptional

The public hears about these exceptional chances in the advertised store. It is not told and does not realize that such chances exist in the non-advertised store, even if that store has them. The public then passes by the non-advertised store because nothing has been suggested to convince anyone that anything is to be gained by trading there. Collingwood Bulletin.
