THERE were 1021 forest fires penarted in Ontario I last season. The vigilance of the fire rangers kept 53 per cent. of these down to a size not exceeding five acres. But yet the total area burned was over 346,000 apresequal to a strip of forest one mile wide from Toronto to Cochrane.

Of the total number, only 52 were lightning fires. In other words, out of every 100 fires, 59 fires were due to man's esrelesaness and were preventable.

Accordingly, the problem of forest protection in Ontario calls for the co-operation of the whole citizen. ship of the Province. If reasonable care be exercised by everyone in the woods to prevent the start of fire, our forests will be safe. Railway officials, cumpers, prospectors, lumber firms, settlers, construction firms al can help by being careful of fire in the woods, and his joining hands with the press, the leaders of public opinion, and the business men of Ontario, in prompting educational propaganda to reduce forest fires,
