With Little Effort

The fact is that a newspaper goes into a thousand or two thousand or five thousand homes without a particle of effort of the man who advertises in it. The merchant must pay for the space he uses, and write the advertisement that fills the space, but having done this, all the rest of the matter of getting this message of the town dealers distributed is the business of the newspaper publisher. The local newspaper renders local merchants a wonderful service, and this at an absurdly small cost.
